

The Versatility of Metal Cladding

Provider: Berridge Manufacturing

Course #: BER23A

Learning Units:

1 AIA LU/HSW

The Versatility of Metal Cladding presentation examines the performance characteristics and attributes of metal roofing and cladding, including differences in aesthetic options, installation practices, and energy-efficiency. This course covers both wall and roofing applications and describes how they can be used to contribute to weather resistance and durability. The design professional will learn about different types of metal cladding and their design advantages. Case studies and project examples will be provided to help illustrate the benefits, diversity and unique properties of using metal on various projects.

To schedule this AIA presentation please email berridge@schwabgroup.net or [fill out this online form](#).

For over 50 years, Berridge has set the standard in designing, developing and manufacturing the highest quality metal roofing and wall panel products in the industry.

Berridge offers over 30 products, including Standing Seam, Alternative Seam, Simulated Tile, Shingle, Wall Panel, Exposed Fastener, Specialty Application, and Fencing Systems. Berridge products are available in Kynar 500® or Hylar 5000® PVDF resin-based color finishes.

Berridge material is available in 24 Gauge and 22 Gauge Galvalume and 0.032 and 0.040 Aluminum.
