MICHIGAN ROPERS ASSOCIATION

Rating List as of 9/21/25

Please note: This is not related to the "USTRC" rating in any way. This numbering system is used for MRA purpose only. Please be advised, that you are able to protest anyone's rating at any time. Please contact a director or the office with your comments. These ratings can be changed at any time throughout the year.

Michigan Ropers' Association Rating Guidelines:

You should only judge ropers that you have seen rope at jackpots recently. Rodeos and practice pen should not be used as strongly in determining the roper's rating - because we are roping several part in your decision.

rounds and under some pressure. The last round of a roping should be the most important. If there is a question on a Header, leave them lower; on a Heeler, move them up - they will hurt a roping more than a wrongly numbered header. Age and sex should play a small

1 A new roper who is learning. Also includes ropers who are inexperienced roping this particular end. (I.e. - a heeler who does not head, a calf roper who does not team rope)

2 A roper who is now riding better and swings their rope more aggressively. Header: about half their catches will be neck catches; they are still inconsistent in handling of cattle. Heeler: Catching their steers on a more regular basis; still rope most of the steers by one foot. Consideration is taken into account for what part of the arena they catch at.

3 Rides well and is putting runs together. Header will rope 5-7 steers out of 10; Heeler will rope 4-7 out of 10, catching over half by two feet. Roper is positioned correctly most of the time. Roper will start to stand out at ropings but will still not dominate them. They will be in the last round of the ropings most of the time.

4 Headers: catch about the same number of steers as #3 (5-7 out of 10) but will catch most of them by the horns, rides the barrier well and handles cattle well. Heelers: rope more steers by two feet than the #3. These ropers will be in the last round of the ropings and also do well in lower level rodeos.

5 Headers: catch 7-9 out of 10 and will rope almost all by two horns; handle their cattle well. They ride barriers extremely well and will always be in the last round of the ropings. Heelers: catch approx. 7-9 out of 10 of their steers by two feet. These ropers will do well extremely well. Very consistent. Heeler: Catch most of their cattle at the Pro. Rodeos.

6 Headers: Able to control the speed of the run & handle cattle well. Will rope most steers in the upper 1/3 of the arena. Ride the barrier extremely well. Very consistent. Heeler: Catch most of their cattle by two feet. Usually in the right position to rope steers on the 3rd or 4th jump. Will most always be in the last round of the roping.

7 Header: Rides the barrier extremely well and able to reach and rope steers consistently. Handle both horse & steer well and able to make speed adjustments to the run as necessary. Heeler: Consistently in the correct position to rope the steer on the 2nd or 3rd jump. Has the ability to take time out of the run by his/her rope and horse handling skills.
