## T/D

**WORLD'S MOST ACCURATE  
SUPER TOURNAMENT BOW!**

*Winner of 5 out of 6 Olympic Medals!*

Proven at the 1972 Olympics! . . . the uncanny Pro Medalist T/D beat the entire field in world-wide competition—winning First Place Gold Medals in both Men's and Women's Events—and an overwhelming sweep of 5 out of 6 Medals in the first Olympic Archery Competition! Its design superiority further distinguished itself by new records in the single and the double FITA Rounds, and also the 30-Meter Distance.

The Hoyt-engineered, torque stabilized design innovation that changed bow concepts in the past decade, has been utilized with even greater advanced improvements to bring you the ultimate of unequalled dependability in bows. The new Pro Medalist T/D has been diligently engineered to perfection with the "built-in" accuracy you need for championship performance!

Beautifully sculptured, lightweight magnesium handle is fitted with stainless steel guide pins and bushings and snap on, interchangeable thumb rest pistol grip, textured for better grip. Exclusive patent-pending limb mounting system has precision-machined bearing surfaces. Action-cor limbs snap in or out without tools, locking in, solid alignment every time with no rattle or squeaks.

### PRO MEDALIST T/D SUPER TOURNAMENT BOWS

# PRO MEDALIST

## Hunter T/D

### *Designed for the serious hunter!*

Power-packed performance! Smooth, silent shooting! Dependable durability! . . . all add up to the ideal hunting companion, whether your hunting trip is to Africa, Alaska, or your favorite hunting spot near home. The versatile convenience of the Pro Medalist T/D (take-down) is invaluable . . . its compactness and light weight stows easily in bow case or duffle bag, or beneath an airplane seat!

The Pro Medalist T/D Hunting Bow was designed with the same exclusive features for pin-point accuracy as the Hoyt Olympic Gold Medal winner—easily handled, fast, and consistently accurate—a combination that can't be beat!

The lightweight, magnesium handle is tough, can't warp or check. Special recess for broadhead overdraw allows 1½" shorter hunting arrow. Action-cor powered limbs snap in and out quickly without tools and lock with solid, precision alignment everytime!

### PRO MEDALIST HUNTER T/D

T/D 16 (Short Handle)

# PRO MEDALIST

## Super Tournament Bow

### Award-winning Original Torque Stabilized Bow

The Pro Medalist Bow has won every world FITA Championship since 1963 . . . its record-smashing ability in sweeping tough World, National, and Local Championships has established a new criteria in archery! Scientifically designed and engineered with many innovating features—the Hoyt patented, years ahead improvements of the revolutionary Pro Medalist have become a recognized standard for most well known bows today! Exquisitely detailed handle is new, stronger super wood in rich, deep contrasting laminations adding beauty to the functional design for accurate shooting.

- Torque Flight Compensators (TFC) is a coupling that complements the function of the Torque Stabilizer by improving accuracy and dampening out vibration. Pat. 3,412,725.
- Dynamically-balanced Limbs for greater accuracy. Pat. 2,995,130.
- Micro-Rest—fully adjustable to degree of center-shot desired, up to a full ¼" past center. Pat. 3,292,607.
- Pro Rest—attaches to the Micro-Rest supplementing the effectiveness of each, assuring non-interference arrow passage.
- Pistol Grip with Thumb Rest—provides a more comfortable and functional bow grip. Pat. 2,995,130.
