Subject: RE: Draft agenda - Comments and Additions

Hi Karen,

The agenda looks good, If I can add something that would fit nicely into the discussion of Brainstorming Session - Energy Mandates – add in the sentence: **“Getting to Zero Net Ready”** – This is more of a positioning of your building and preparing for the technology as needed. It’s really the next big step in assuring our members buildings are positioned well to maximize energy savings and that next wave of building technologies driving energy efficiency.

With the Data Access: How do we expedite progress? Would like to throw out to attendees and members their interest with BOMA being a *data facilitator* (through a 3rd party) and or provide direction towards resources making sure energy data is available for use and or submitted for our industry benefits. Currently, our industry is fragmented with numerous data warehousing portals all providing a little something different. While Energy Star – Portfolio Manager is a good system of choice for our members, BOMA International members have a wealth of informational resources that should be utilized and customized for our industry and members use. Just a discussion topic!

A question may be asked if there is a desire and or interest in companies and or portfolios wanting to share data and or participate with pilots that seek to leverage BOMA’s member data thus providing a customized tool that could benefit out members cost effectively.

Carlos,

Have you all had a chance to look over the agenda? Any changes? Let me know if you’d like to discuss.

Thanks!
