

March 27, 2015

My background?

My background is comprised of 40+ years of work experience in the private sector. I have worked in business, commerce, and industry. My education is composed of an Associates of Arts degree, a Bachelor of Science degree in General Business Administration, a Security Academy, and a Master of Management degree. I have owned my own business since January 2002 which is a personal holding company. I am single, never married with no dependents. I have worked my way through my college career entirely self-supporting. I currently work 55 to 65 hours each week for two employers and my schedule ranges 7 to 10 day work weeks since April 2009. I am 56 years old and I feel as though I have the energy potential of a 16-year-old male. I just bought a bench press with weights yesterday, and in my spare time I plan on beginning to lift again. Before fall I plan to start running hopefully on a treadmill in my apartment and attain the distance of 3 miles in 27 minutes at Marine pace once again.

What motivated me to run for President?

I have always followed at a distance our Countries political system. I have always loved our Country and the vast diversity of everyone that makes up our Nation. The events of 9/11 that took place ignited my desire to volunteer my efforts for the benefit of all Americans. I currently have three federal projects on board with the White House, Capitol Hill, the United States Secret Service, the Central Intelligence Agency, the Department of Defense, and the National Aeronautical Space Administration. These three federal projects will assist America with the war on terrorism and drugs, and reconstruct industry in our country utilizing clean energy generation therefore, generating no greenhouse gases and no global warming. My intellectual property for an airport system also includes steam heated runways. I also have proposed a recycling facility powered by clean energy generation. The potential of the airport system, adaptable airport system with industrial zones and clean energy generation, and the recycling facility as a potential for glass plastic aluminum copper and steel. The potential is six facilities for state across our Country for total minimum of 300 facilities. I have also proposed a weapon system which I have titled a gift for children which deals with

satellite control systems. These three projects and the background information on them is available to everyone's research at my campaign website, www.MichaelBickelmeyer.com. Please click on the research tab and enjoy the reading. It will be to our advantage in America to counter the effects of climate change in the winter. Because of these federal projects and activities I have been having monthly communications with the Cleveland Ohio field office of the United States Secret Service since July 2007. It is at their request that I maintain contact with them monthly so they can make sure that I am okay.

What I have done to campaign so far?

Initially my campaigning was an endeavor running for United States Senator in Ohio here in 2016 and President of the United States of America in 2020 as a Republican simultaneously. During this time I invested nearly \$4000 of my own personal funds to maintain the campaign. I received no campaign contributions from anyone for my campaign. While going door to door solely in the city of Parma, Ohio to secure the needed signatures to be put on the ballot for the senatorial race I always encountered a favorable response once I explained my ideas. During 2014 I received many recommendations face-to-face that I should disregard running for United States Senator and immediately run for President of the United States of America in 2016. These responses were received from Republicans, Democrats, and Independents. I am certain that if our 310 million citizens in America would access my campaign website and do all of the reading, no other Presidential Candidate would ever stand a chance next to me. My three federal projects began in January 2002 to counter the effects of our economic downturn, climate change, and the war on terrorism and drugs. No other candidate that I know of has proposed any projects like I have which will generate job creation and propose an upswing of our economic domestic curve.

Thank you.

Sincerely,

A handwritten signature in cursive script that reads "Michael Bickelmeyer".
