Notes:

1. Refer to Ductile Iron Pipe Special Instructions in the General Information tab.
2. The actual OD of a Ductile Pipe is larger than the actual OD of Iron Pipe for the same nominal size. The pricing for Ductile Iron Pipe is slightly higher.
3. TRYMER 2000 Table 15 has pricing for Ductile Fittings.
4. **The insulation thickness for Ductile Pipe does not conform to nominal insulation thickness. For example: if you order 2" insulation for a 14" ductile pipe, the ID of the insulation is 15.3 and the OD of the insulation is 19.3. Cook Brothers is able to make the insulation thinner (19.0), actual (19.3) or thicker (20.0). Actual OD's will not match Fitting OD's. Therefore, Cook Brothers offer the choice of insulation thickness the customer desires. If your order is not clear our office staff will call to clarify the insulation thickness that you want.**
5. Refer to the Ductile Pipe OD Comparison Table in the General Information tab.
