

# JESUS CHRIST'S LIFESPAN

## DETERMINING THE JUBILEE CYCLE PATTERN SINCE CHRIST'S YEAR OF BIRTH

The purpose of this illustration is to present the theory that strongly suggests that based on Jesus' birthday, as Jesus first came Earth, it led to coincide with a Jubilee Year in which He started His earthly ministry. This was confirmed when Jesus read aloud in the Synagogue at Nazareth the portion of the Isaiah scroll. It specifically referred to the Year of Jubilee that always follows a Sabbatical Cycle of 7 years x 7 times or 49 years total. In this case, the 50<sup>th</sup> year would constitute the Jubilee Year and that is what Jesus stated was 'fulfilled in their hearing'. Thus, the theory contents that in turn, one can calculate when will Jesus' return to Earth. It will likewise coincide with an end to a Sabbatical Cycle of 7 years. To know what year that will be, one has to determine what year the Jubilee Year corresponded in Jesus' life, at the start of His ministry.

One only needs to calculate from the date of His birth, to determine with accuracy the year of the subsequent Sabbatical Cycle of 7 years and then Jubilee Year. Both times will thus correspondence in tandem to Jesus' start of His ministry and return. Can this assertion be possible to calculate and reliable? As noted, the premise is based on Jesus' birthday. Following is the argument and calculation based on the Sabbatical cycles of time. If -3 BC was Jesus' birthday as many purport, then it would have been in 28 AD when Jesus had read publicly the portion of Isaiah that declared the Jubilee Year. This would have but the year 27 AD as the end of the Sabbatical Cycle of 7 years. This in turn would accurately then pinpoint the culminating Jubilee Year. Thus, the return of Jesus based on this pattern and timeline would be in 2029.
