

## WATERBARRIER® TECHNOLOGY

WaterBarrier® combines a medium density overlay (MDO) over the exterior surface of the door with water-resistant glazing beads and bars for an exterior that's not only resistant to moisture, but provides a beautiful surface for paint. And when combined with any wood species on the inside, you can match your interior woodwork and keep the warmth and natural beauty that wood provides.

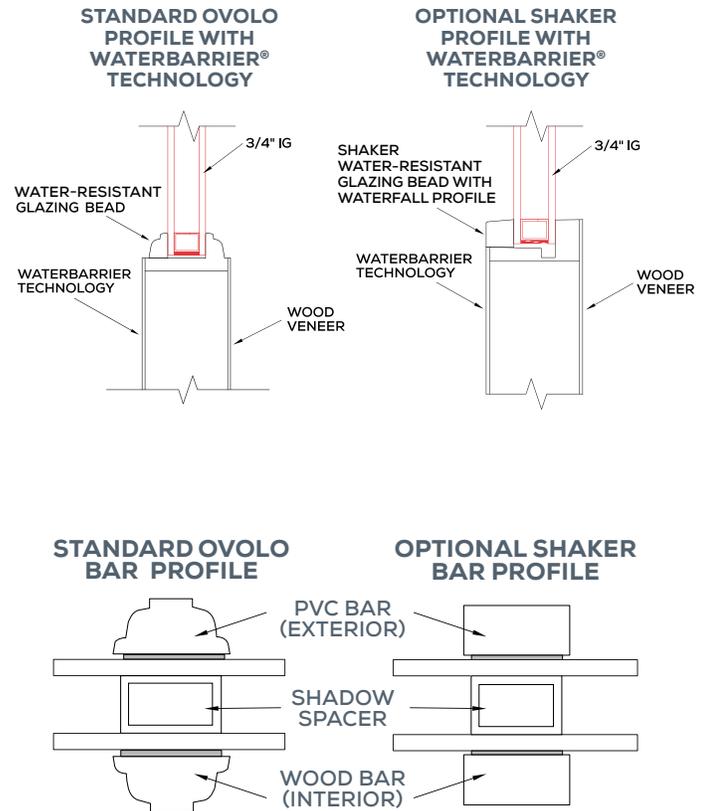

### PROVEN TRACK RECORD OF PERFORMANCE

- The overlay in WaterBarrier technology is commonly used for street signs and concrete forms
- Minimizes the possibility of stile-and-rail separation
- Excellent durability and resists moisture absorption
- 5-year warranty, no overhang required

### FLEXIBLE DESIGN OPTIONS

- Can be ordered in virtually any door design for a variety of exterior applications, including entry, side and patio doors
- Available for use with any wood species
- Overlay has thermoset acrylic latex primer topcoat, resulting in superior paint application

All doors with WaterBarrier come standard with UltraBlock® technology and our Weather Seal™ process at stile and rail joints.

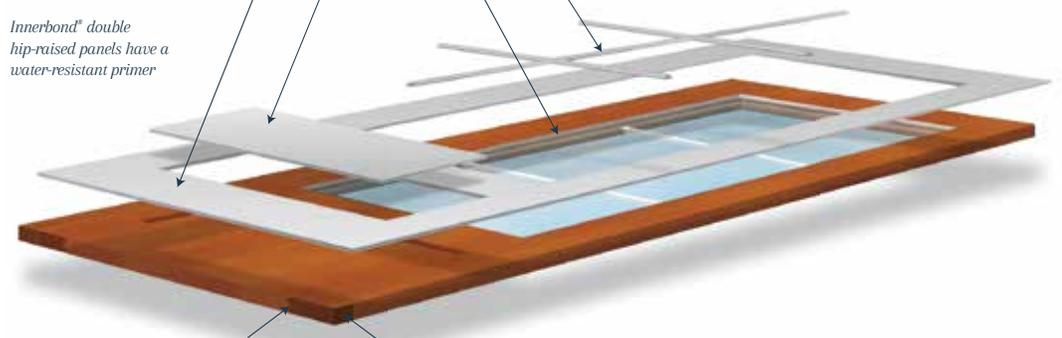

## WATERBARRIER® TECHNOLOGY

Water-resistant glazing bead and SDL bars on exterior side. Wood bars on interior side.

Primed Medium Density Overlay for flat surfaces

Innerbond® double hip-raised panels have a water-resistant primer

### WEATHER SEAL™ PROCESS

Entire stile-and-rail joints coated and bonded to decrease the possibility of water infiltration

### ULTRABLOCK® TECHNOLOGY

Composite block material finger-jointed into the bottom of the stiles
