## YETTER STALK DEVISTATOR

Today's hybrids develop tough stalks that can destroy expensive tires and tracks on equipment. The 5000 Stalk Devastator™ saves tires and tracks by knocking over, stomping, and crushing stalks while leaving them attached, speeding up the cornstalk breakdown process and improving field conditions for spring planting.

**Features**

- Prevents damage to tires, tracks, wires, and hydraulic hoses on combines, trucks, tractors, and implements
- Knocks over and crushes stalks for faster decomposition and microbial breakdown of residue
- Preserves residue cover, reducing soil erosion and keeping stalks in place in windy conditions
- Quick and easy to install with mounting kits for most corn head models
- Features spring-loaded, adjustable down pressure
- Solid steel construction ensures reliability and durability
- Will not interfere with most head cart trailers
- Rollers can be locked up for transport of head or when not in use.
