- * Serrated Teeth Allows More Cutting Surface.
- * Stays Sharper Longer.
- * Lasts Longer.
- * .116" THICK
- * Up to 18% Less Force Required To Cut!

6mm. HD SICKLE FOR MAC DON

Many Growers who own a Mac Don Draper head have been commenting through the years about excessive bolt breakage on their sickle. Through our research we have found some common results. The speed of the sickle needing to run at 600-650 rpm's to maintain desired ground speed, adds additional stress to the 12-24 bolts used for the sections.

"I GET HALF AGAIN MORE ACRES OUT OF YOUR SECTIONS AND SICKLE OVER THE O.E.M. SETUP!"

-Darke Co. Ohio Grower

Upon further research we found that most manufacturers that run these sickle speeds usually run heavier section bolts on the sickle.

We at R.E. Skillings Supplies Inc. have come up with a sensible solution for the bolt issue.

The **SKILLKUT™** Sickle

Benefits of Our Sickle:

- 6mm. (Heavy Duty) Diameter Elliptical Section Bolts instead of Knurled 12-24 bolts.
- Oval shoulder bolt design will speed up changing a broken section. No more pounding out bolts to pull out the section. The oval shouldered bolt will simply drop out the bottom to make section change quicker.
- Choice of section available: Tiger Shark (3.5 TPI), **SKILLKUT** (5.3 TPI) , or the Super Seven (7 TPI) standard section.
- Redesigned Sickle Splice Kit makes repair simpler and faster.
- **After a year's experience with this sickle design on over 45 Mac Don heads, we have found that the section bolts breakage is almost nonexistent!**

OVAL HOLE

OVAL Shoulder Bolt Slips Into The Knife Back With Ease!
