DECODING PLANT CONSTITUENTS: A SEMINAR FOR HERBALISTS

WITH KEVIN JERNIGAN, PH.D.

Learn to understand and recognize the chemical compounds responsible for herbal actions. We'll explore bonding, chemical structures, functional groups and more as you learn how alkaloids, terpenes, saponins and other compounds found in medicinal herbs affect the body.

Kevin Jernigan is a life-long plant geek specializing in medical ethnobotany and ecological anthropology. His research focuses on the traditional use of plants in various cultures.

February 18 & 19, 2017, 9:30 am - 4:30 pm
Astoria Building, 2233 Peachtree Rd, ATL

\$175 early registration. After Feb. 1, \$200
\$50 deposit holds your place!
