

# SDI | RIVA STAR

TOOTH DESENSITIZING AGENT

THE ORIGINAL  
SDF SYSTEM

# NEW GENERATION OF DESENSITIZER WHICH IMMEDIATELY REMOVES TOOTH SENSITIVITY

A STAR PRODUCT CONTAINING THREE POWERFUL COMPONENTS:

ASSISTS IN THE ELIMINATION OF BIOFILM<sup>1-3</sup>

INHIBITS BIOFILM FORMATION<sup>1-3</sup>

MAY ASSIST IN THE ALLEVIATION OF CARIES<sup>4</sup>

# TOOTH DESENSITIZING AGENT

## TWO YEARS AND BEYOND DESENSITIZING EFFECT

Clinical studies support the immediate effect of Riva Star and its long term effect of over two years.

## INCREASING BOND STRENGTHS OF GICS

Pre-treating tooth surfaces with Riva Star is a great way to enhance bonding of glass ionomers to dentin.

## PATENTED PROCEDURE

Unlike other silver fluoride systems, Riva Star's two step patented procedure minimizes the risk of staining. By applying the potassium iodine solution over the silver fluoride solution, a silver iodide precipitate is formed.

## KEY FEATURES

Clinically tested and proven  
for decades

Esthetically pleasing for the patient  
- reduced staining

Immediate dentinal hypersensitivity  
relief for adults over the age of 21

Non- invasive - suitable for MID

Patented Technology

## RIVA STAR - NO STAINING

Desensitizing treatment on the  
cervical region of the canine.

Before treatment

After 7 days of treatment

Desensitizing treatment on the  
cervical regions of premolars.

Before treatment

After 7 days of treatment

## INSTRUCTIONS CAPSULES KIT

- 1 Isolate area to be treated with Gingival Barrier (SDI Limited), cotton rolls or rubber dam, or protect the gingival tissue around the affected tooth with petroleum jelly.
- 2 Using the silver brush provided, pierce through the foil of the Step 1 (silver capsule) and carefully apply the solution to treatment site only.
- 3 Immediately after, use green brush provided, pierce through the foil of the Step 2 (green capsule) and apply a generous amount of the solution to treatment site. Treatment surface initially appears creamy white, keep applying solution from green capsule until it turns clear.
- 4 Blot dry.
- 5 Remove all protective/isolation materials used in the mouth.
- 6 Discard used capsules and brushes in accordance with local regulation.

**CAUTION:**  
The material could stain teeth if incorrectly used. Patient must be informed of this risk prior to its use.

## INSTRUCTIONS BOTTLE KIT

- 1 Isolate area to be treated with Gingival Barrier (SDI Limited), cotton rolls or rubber dam, or protect the gingival tissue around the affected tooth with petroleum jelly.
- 2 Before opening, tap each bottle on a bench. This action will help minimise any premature liquid drips that may occur.
- 3 Dispense one drop of Step 1 (grey label) solution onto non-absorbent mixing pad.
- 4 Carefully apply 0.01mL of dispensed solution to treatment site only, a medium sized micro brush, such as Points (SDI Limited) is recommended.
- 5 Immediately after, dispense two drops of Step 2 (green label) solution onto fresh non-absorbent mixing pad.
- 6 Apply a generous amount of the dispensed solution to treatment site using a medium sized micro brush, such as Points (SDI Limited) is recommended. Treatment surface initially appears creamy white, keep applying Riva Star Step 2 solution (green label) until it turns clear.
- 7 Blot dry, remove any gingival protection used. Discard used mixing pads and brushes in accordance with local regulations.

**CAUTION:**  
The material could stain teeth if incorrectly used. Patient must be informed of this risk prior to its use.

## ORDER DETAILS

### RIVA STAR

Riva Star Kit	8800504
10 x Riva Star Step 1 Silver Capsules	
10 x Riva Star Step 2 Green Capsules	
Accessories	

### RIVA STAR

Riva Star Bottle Kit	8800537
1 x 1.5mL Riva Star Step 1 Bottle	
1 x 3.0mL Riva Star Step 2 Bottle	

YOUR SMILE. OUR VISION.
