

### Lubricating Oils with Rust Inhibitors

- Water displacing for corrosion-prone metallic surfaces
- Emulsion oils for protective coating over paint, zinc-phosphate or alkaline-blackened steel

### Phosphate Coatings

- Manganese, zinc, iron and calcium-modified zinc phosphate processes

### Cleaners

- Acid and alkaline cleaner for steel, copper, aluminum and brass
- General maintenance cleaner
- Cleaners for descaling cooling water tubes in water-cooled rectifiers

### Conversion Coating Hexachrome Chemistries

### Industrial Oils

- Spindle
- Turbine
- Quench
- Waylube
- Cutting
- Hydraulic
- Gear

### Mineral Seal Oils

### Rust Removers

- Neutral de-ruster for ferrous metal surfaces
- Pickling solutions to remove mill scale, rust, and other forms of oxides

### Plating Processes

- Zinc
- Zinc-nickel
- Copper
- Tin-zinc
- Zinc-iron
- Cadmium
- Nickel

### Inhibited Acid-Based Specialty Cleaners

- Replacement for liquid acids

### Conversion Coating Trivalent Chromium Chemistries

### Base Oils

- Naphthenic
- Paraffinic

### Engine Oils
