

Consulting Services

Description

Our Consulting Services are offered based upon client demand. As with any service, we find it important to establish a clear definition of Client Needs first, in order to clearly define expectations and plan to achieve those goals. So our services are broken down into two categories; cause of the need determined or undetermined.

Cause Determined. If the Cause is already known, we will custom build a course to satisfy that need.

Cause Undetermined. If an improvement is needed, but the Cause & Solution is unknown, we will conduct a formal Needs Assessment to address the issue.

Typical Examples of Methods Utilized

Team Building

Understanding Our Personality Differences - DiSC

Problem Solving – (PDCA or Practical Problem Solving)

Lean Thinking –Understanding Waste (Non Value Added activities)

Dealing with a Disorganized Workplace – Implementation of 5S

Creating and Training with Standard Work Instructions

Six Sigma (White to Black Belt levels)

Total Productive Maintenance

Strategic Planning (Hoshin Kanri or others)

All methods offered are built for a variety of applications such as:

- *Manufacturing*
- *Transactional*
- *Financial*
- *Academic*
- *Pharmaceutical*
- *Other Organizational Application*
