

UR ORION DRAGON TEMPLE STAR GATE

The 2nd association was an astronomical relationship in which the 3 chambers of the Ur Ziggurat corresponded to the belt stars of Orion. What this study further presents is that based on the template of Orion upon the ancient city core of the Ziggurat of Ur, the temple itself is patterned to represent the 'Cosmic Dragon' nebula that is on the ley-line of Orion's anthropomorphic outline. This 'Cosmic Serpent' is referred to as the Horseshoe nebula but many see it as a masked flying red dragon sort of composition given the apparent appearance of it. Thus it is highly suggested by this study that the ancient rulers of Ur knew or had prior knowledge of this astronomical construct that was impossible for such people to know or ascertain without the aid of a powerful magnifying telescope.

A mere-direct eye observation on the clearest of night skies would not have determined this. This supposition thus also suggests that the rulers of Ur had this Orion celestial map configuration given to them by those that either came from there or knew in some direct way that such a 'Cosmic Dragon' nebula was adjacent to the belt of Orion. Could this knowledge been part of the secrets the Fallen Angels gave to humanity as stated in the books of Genesis and Enoch? It would seem so. The city-state of Ur in ancient Iraq was thought to be part of the original founding cities that Nimrod established along with Babylon after the Flood of Noah. Interestingly, it is adjacent to a modern day military base that Saddam Hussein built and subsequently the US led invasion of Iraq later built up and ran.

- DISTANCES**
- 666 nautical miles to Mecca
 - 666 miles to Mt. Sinai in Arabia
 - 777 nautical miles to Great Pyramid
 - 1440 km to Great Pyramid

Allah
as a 'Serpent'.

The Call of Abram

YHVH summons Abram to leave the land of Ur, worshippers of Nana or the Moon God 'All-ah'.

shrine of the Moon God
Nanna
'Lucifer'
The Red Dragon
'All-ah' god of the Muslims

This supposition would be in line with the other ancient storylines of temples built to the 'Shining One' or 'Flying Serpent' god that came down from Orion-and/or the Pleiades. This ancient motif and cosmological construct is seen in the Temple of Quetzalcoatl in Teotihuacan. Could this 'Serpent' or Dragon like nebula that is at a 33 degree angle from the Orion belt stars as it is in Ur with the Ziggurat a possible abode of Lucifer before his fall? Are such places going to be part or partial of the 'Principalities and Powers on High' that will be vacated as Lucifer and his Fallen Angelic minions are expunged forever from their 'thrones' and estates to make room for the Bride of Christ instead be given over as the spoils of Jesus Christ's victory over sin, death and Lucifer? Such possible associations ascribed to Orion corroborate the long standing supposition by other Bible and non-Biblical researchers.
