DENVER 5, COLO.

Since 1928

DESIGNED FOR THOSE WHO WANT AN ATTRACTIVE, FINE QUALITY BOW AT A MODEST PRICE

LENGTH: 62"
WEIGHTS: to 45 Lb.

No. 166
\$32.50

Especially designed for today's indoor automatic archery lanes, the LANE-MASTER is a fast and rugged bow. A stable, smooth shooting bow that provides performance usually found in the higher priced custom bows. Made with finest grade Bubinga handle (a durable hard wood that takes a beautiful finish), Maple core, and famous Gordon fibreglass. Semi-working recurve limbs... full view sight window... comfortable form fitting pistol grips... and double loop custom bow string. One year guarantee. A good buy for those who want a good, all around bow at a medium price.

FRONTIER-SCOUT

LENGTH: 60"
WEIGHTS: to 40 Lb.

No. 177
\$24.50

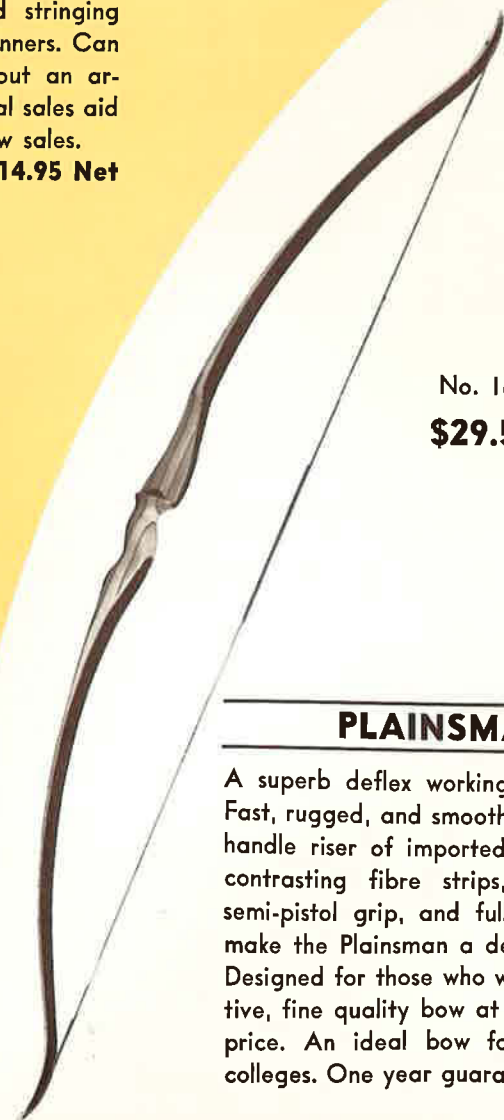

LANE MASTER TRAINING BOW

A necessity for dealers! Only 4 lb, this bow helps teach correct form and stringing technique to beginners. Can be released without an arrow. A professional sales aid for promoting bow sales. No. 166T\$14.95 Net

PLAINSMAN

LENGTH: 66"
WEIGHT: to 60 Lb.

No. 165
\$29.50

FRONTIER-SCOUT

A balanced, full centershot bow with highly efficient working recurve limbs give you speed and shooting ease. Built with the finest fibreglass and tapered hardwood laminations available. The semi-pistol grip Degame wood handle riser offset with thin fibre strips adds beauty and style to this bow. A real value and a treasure to own. One year guarantee.

PLAINSMAN

A superb deflex working recurve bow. Fast, rugged, and smooth. Beautiful 24" handle riser of imported Degame with contrasting fibre strips, center shot, semi-pistol grip, and full sight window make the Plainsman a delight to shoot. Designed for those who want an attractive, fine quality bow at a very modest price. An ideal bow for schools and colleges. One year guarantee.

The "Medalist"

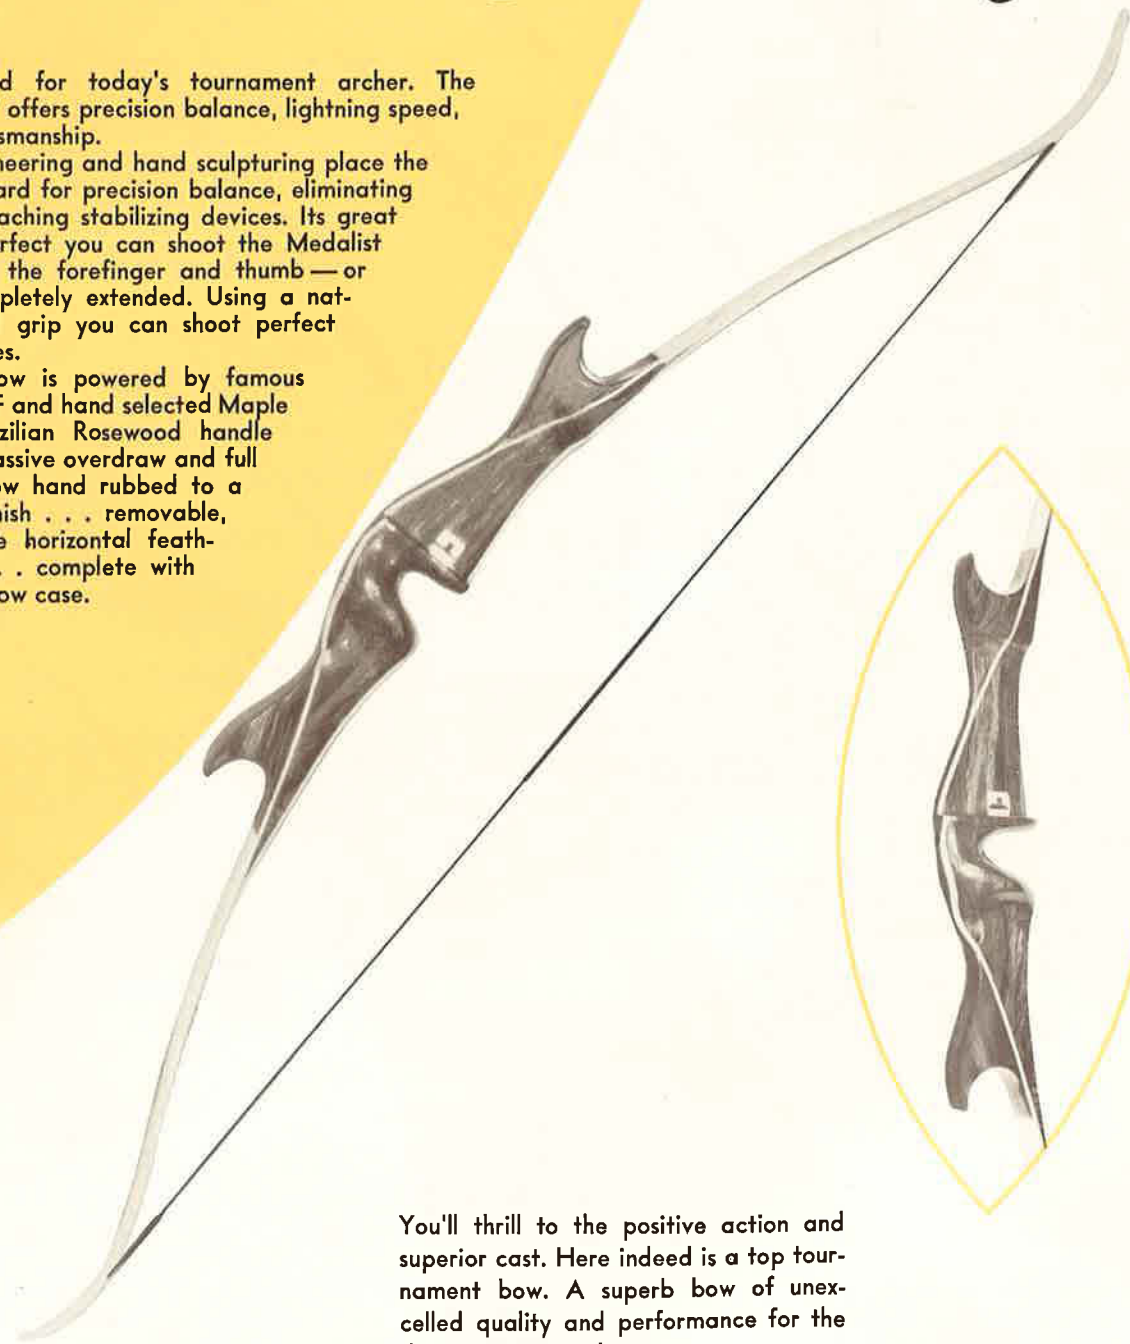

BY

Fleetwood

A bow designed for today's tournament archer. The MEDALIST BOW offers precision balance, lightning speed, and expert craftsmanship.

Professional engineering and hand sculpturing place the bow weight forward for precision balance, eliminating the need for attaching stabilizing devices. Its great balance is so perfect you can shoot the Medalist with a touch of the forefinger and thumb — or with fingers completely extended. Using a natural and relaxed grip you can shoot perfect tournament scores.

This beautiful bow is powered by famous Gordon BO-TUFF and hand selected Maple core... rich Brazilian Rosewood handle section with a massive overdraw and full view sight window hand rubbed to a perfect luster finish... removable, pressure sensitive horizontal feather arrow rest... complete with complimentary bow case.

You'll thrill to the positive action and superior cast. Here indeed is a top tournament bow. A superb bow of unexcelled quality and performance for the discriminating archer.

Made in 5'8" length only and weights from 20 lbs. to 50 lbs.

No. 144\$125.00

→ FLEETWOOD →

"Mountaineer"

No. 160 The "Mountaineer" Bow
\$39.50

Perfect for every member of the family. Made of the very best available fibre glass, tapered laminations, large 24" handle riser with saddle type handle. Center shot, overdraw, recurve design.

This combination hunting and target bow is 5'6" in length. Any weight to 60 pounds. Standard one year guarantee.

FLEETGLASS

FLEETGLASS—The finest fibreglass arrow shafts made. Our tubular fibreglass shafts are manufactured in our own factory of the best materials available. Every machine operates automatically, making each shaft micrometer perfect. A special exclusive process makes the spine even throughout the circumference of the shaft. You can pay more, but you cannot buy a better glass arrow. Sizes to match any weight bow from 20 to 80 pounds.

- Made in 8 different sizes to match all Bow Weights.
- Aluminum Nock insert factory installed
- Uniformity of spine throughout the circumference of the shaft.

Arrow Shafts... by Fleetwood

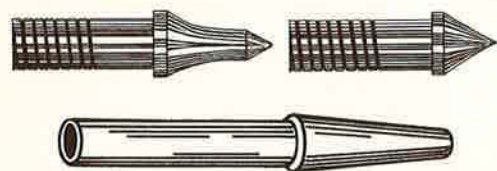

FLEETGLASS SHAFTS

Complete with points.

No. FG-16.....\$13.95 Dozen
Be sure to state bow weight and draw length.

STANDARD SHAFT LENGTHS

No. 201 and No. 211 are 28". No. 227, No. 242, No. 250, No. 257 and No. 265 are 30".
32" shafts are available on special order, at an additional cost of \$1.00 per dozen.

One dozen insert type points with each dozen Fleetglass Shafts. Specify whether you want steel insert target points, steel insert field points, or Broadhead adapter for hunting points.
Extra insert type points \$3.00 per dozen.

No. 923 EPOXY CEMENT... 98c

PREPARED SHAFTS

Prepared shafts are cut for "draw length" with points installed. Add \$1.20 per dozen to the list price for preparing shafts. Be sure to state draw length desired.

FINISHING YOUR SHAFTS

1. Cut shafts to length and install points with Epoxy Cement.
2. Break shaft glaze on feather area by sanding very lightly with No. 80 grit sandpaper.
3. Apply clear lacquer to full length of shaft.
4. Install nocks with Epoxy or household cement.
5. Fletch with a household cement.
6. Crest as desired.

No Point included.....\$9.95 Doz.

HUNTING ARROWS

CUSTOM-MATCHED

Fleetwood matched arrows are held rigidly to exacting specifications found only in the very best arrows made. Shafts are doweled from split stock Oregon Port Orford Cedar, properly seasoned and matched in spine and weight in large numbers. Our arrows are spined on our Micrometer spine tester and weighed on our electric scale capable of holding tolerances of 1/2 grain or 1/1000 of an ounce. Fletched with 5 1/2" feathers, accurately spiraled; two grey-barred with colored cock feather. All lengths to 30".

No. 375 KING OF THE FOREST HUNTING ARROWS

Fleetwood four (4) blade King of the Forest Broadhead, No. 850, 125 grain. This makes a well matched, rugged big game arrow which effects the deadliest killing power ever designed into a hunting arrow. A four blade head has many advantages over the two blade in that it cuts a cross which prevents any binding of the shaft, allowing maximum penetration.

No. 375.....\$17.25 Doz.

No. 370 DEERSLAYER HUNTING ARROWS

Fleetwood No. 855, 125 grain Deerslayer Single-Blade Broadhead.....\$16.25 Doz.

No. 759 9 right or left spiral.....\$3.95

Selecting your Fleetwood equipment:

Whether you are an oldtimer or new to the sport of archery, choosing the correct equipment is very important.

In selecting a bow, remember archery is a sport of skill — not brawn! Usually, men will choose a bow between 35 and 45 pounds and women between 20 and 30 pounds. If your primary interest is hunting, add 10 pounds to these weights. The important thing to remember is to select a bow you feel you could shoot hours-on-end without undue fatigue, holding each shot long enough to take careful aim and develop correct shooting techniques.

Bow weight is determined by the pounds pressure required to draw the bow to a 28" arrow length. All Fleetwood bows are weighed and stamped at 28" because this is the arrow length most suited for the average adult male, and is considered a standard. To compute the bow weight at your arrow draw length, either add or subtract 2½ pounds for each inch more or less than 28".

Proper stringing and unstringing is essential to give your bow the care it needs. As shown in the diagram, place the bow string in position on the lower limb, holding in place with a rubber band. Now, step across the bow with your right leg so that the bow lies behind your right thigh. Spread your feet slightly further apart than shoulder width with the right foot ahead of the left. Raise your left heel off the floor and turn the left toe inward. This will allow the bow to lay flat across your left shoe-lace and avoid twisting the lower limb. Now, with the lower limb off the floor and flat across your shoe-lace and the bow handle across the back of your thigh, apply pressure with your right hand just under the upper recurve and slip the string in place with your left hand. Check to be sure the string is in the groove. Unstringing in the same manner. This is the easiest and correct method.

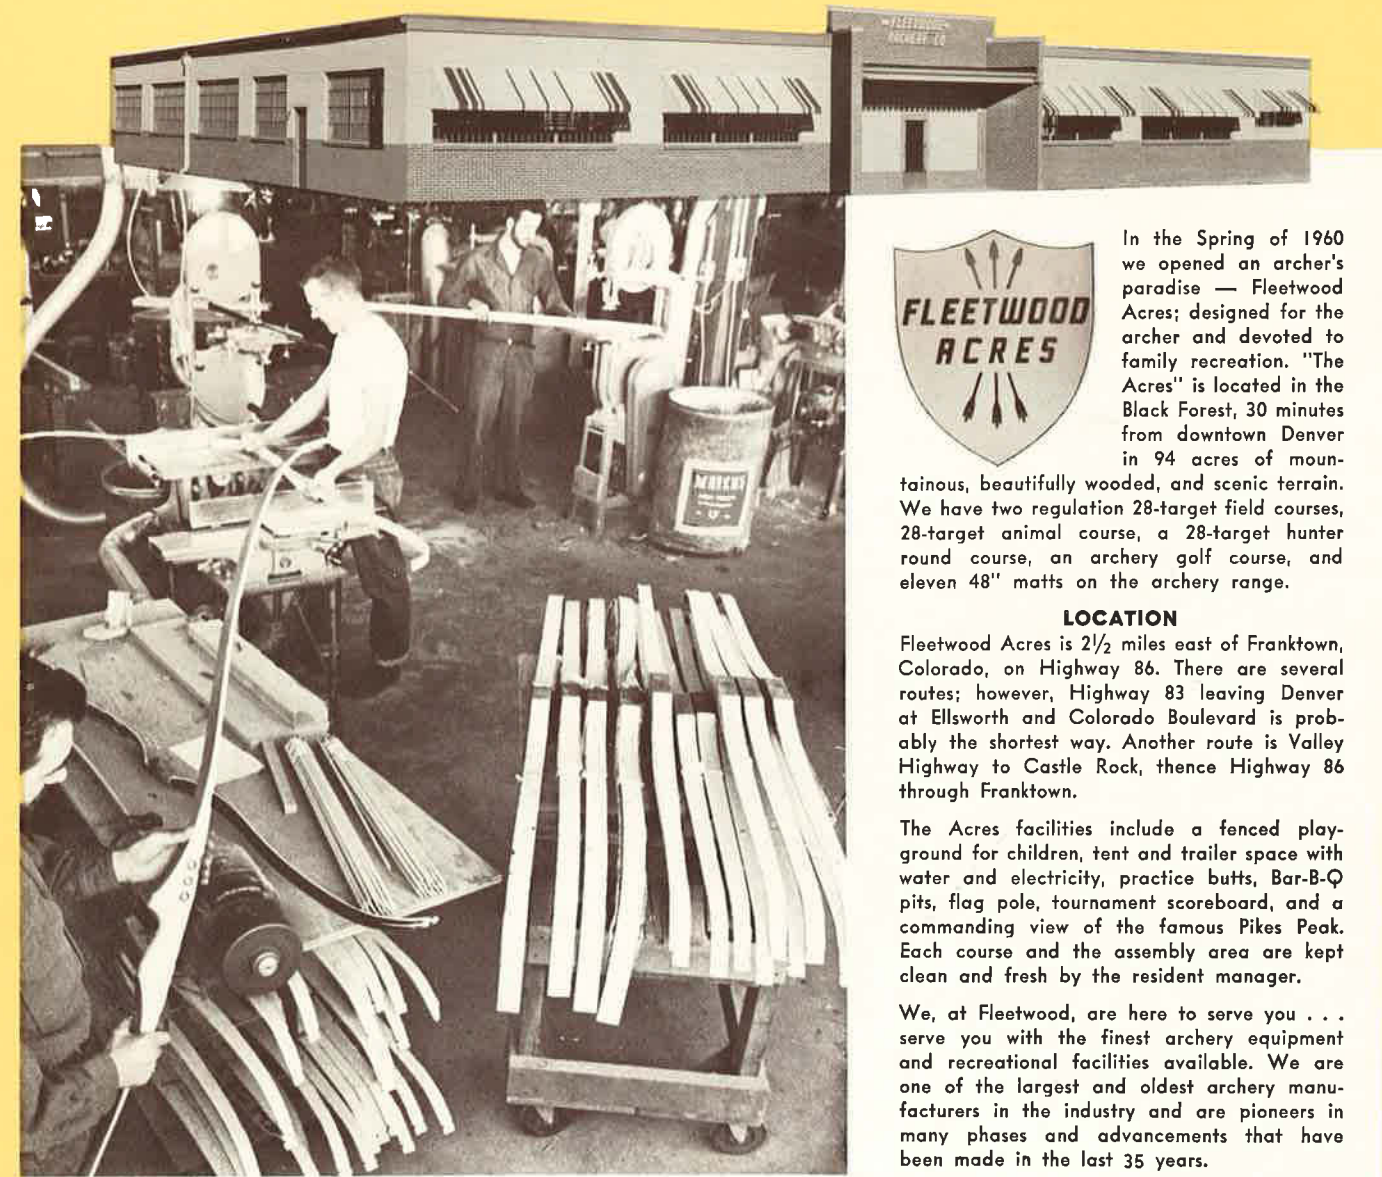

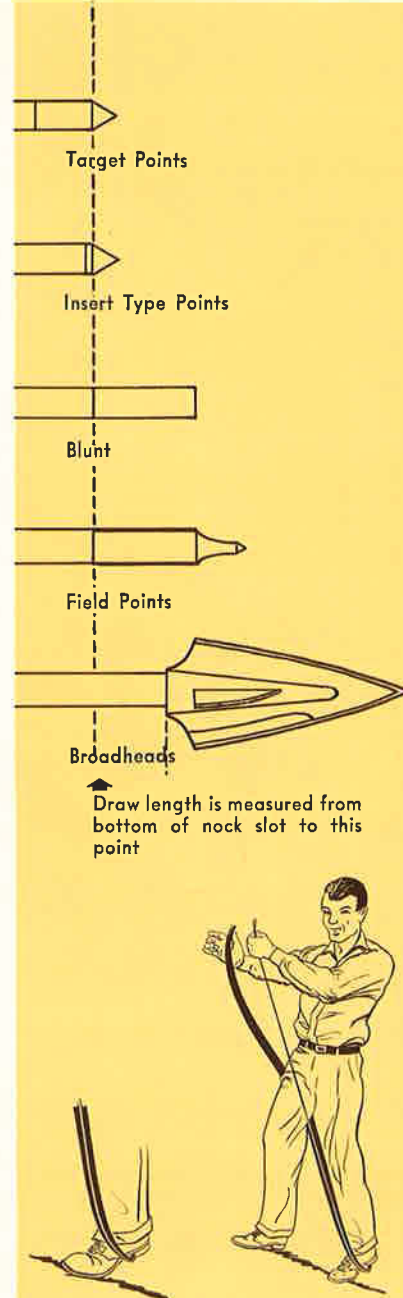

In selecting arrows, there are several types and grades to choose from. There are inexpensive wood arrows for beginners; matched

wood arrows for the more advanced archer; fiberglass arrows for extreme durability with accuracy; and aluminum arrows for precision shooting. All of these grades are available in target, field, and hunting arrows.

More experienced archers use arrows that are both spined and weighed, or matched. Spine is defined as the arrow stiffness. Each arrow in a dozen is the same stiffness. For example, a 30 pound bow would require a more flexible arrow than a 45 pound bow. Correctly spined arrows will fly in a straight trajectory without a fishtail or wobbly flight. Also, each arrow in a dozen is within 5 grains in weight to each other arrow. We at Fleetwood, take great care to precision spine and electronically weigh each arrow in a matched dozen and label the box accordingly. Be sure to state your bow weight at your draw length.

If you do not know your draw length, there are two methods. First, and best, is to use a demonstrator arrow. Facing a wall, draw your bow back in the normal fashion and anchor on your face in the most comfortable position, usually along the cheek bone or under your chin. Ask a helper to mark the arrow at the back of the bow. Repeat several times, being sure to anchor in the most comfortable position on your face. The distance from the bottom of the nock to the average pencil mark is your draw length, to the nearest inch. This will be the length arrow you order regardless of type of arrow. The second method is the yardstick method. Place a yardstick against the center of your chest and extend your arms and fingers horizontally in front of you along the yardstick. The reading at your finger tips will indicate the correct draw length for you.

Arrows of different types are not always the same total length. A hunting arrow, for example is longer to allow for the hunting blade and a slight over draw. We at the factory automatically allow for these considerations in different types of arrows when you order by draw length. See diagram.

In the Spring of 1960 we opened an archer's paradise — Fleetwood Acres; designed for the archer and devoted to family recreation. "The Acres" is located in the Black Forest, 30 minutes from downtown Denver in 94 acres of mountainous, beautifully wooded, and scenic terrain. We have two regulation 28-target field courses, 28-target animal course, a 28-target hunter round course, an archery golf course, and eleven 48" mats on the archery range.

LOCATION

Fleetwood Acres is 2½ miles east of Frantown, Colorado, on Highway 86. There are several routes; however, Highway 83 leaving Denver at Ellsworth and Colorado Boulevard is probably the shortest way. Another route is Valley Highway to Castle Rock, thence Highway 86 through Frantown.

The Acres facilities include a fenced playground for children, tent and trailer space with water and electricity, practice butts, Bar-B-Q pits, flag pole, tournament scoreboard, and a commanding view of the famous Pikes Peak. Each course and the assembly area are kept clean and fresh by the resident manager.

We, at Fleetwood, are here to serve you . . . serve you with the finest archery equipment and recreational facilities available. We are one of the largest and oldest archery manufacturers in the industry and are pioneers in many phases and advancements that have been made in the last 35 years.

your FLEETWOOD GUARANTEE

All equipment shown in this catalog is guaranteed not to be defective in either workmanship or materials. You may expect Fleetwood equipment to be superior in every respect to what we modestly say about it. A great deal of pride, time, and ability has gone into each Fleetwood product. Should any product be found defective in workmanship or materials contact Fleetwood by card or letter explaining the condition and we will promptly reply with appropriate instructions. If found defective we will either replace or make proper adjustment.

Every Fleetwood bow is numbered and accompanied by a registration card which must be filled out and mailed by the purchaser within ten days after date of purchase. Should failure occur in a bow so registered within a period of two months after date of purchase, the Fleetwood Archery Co. will make free repair or replacement unless the bow shows evidence of misuse or improper handling. Claimant must be the original owner and the bow serial number must be intact. After this sixty-day period and provided the bow has not been abused or mishandled, replacement will be made on an exchange basis whereby the owner will pay for the use he has had from the bow at the rate of 10% per month based on the purchase price. Dealers are not authorized to make replacement or adjustments.

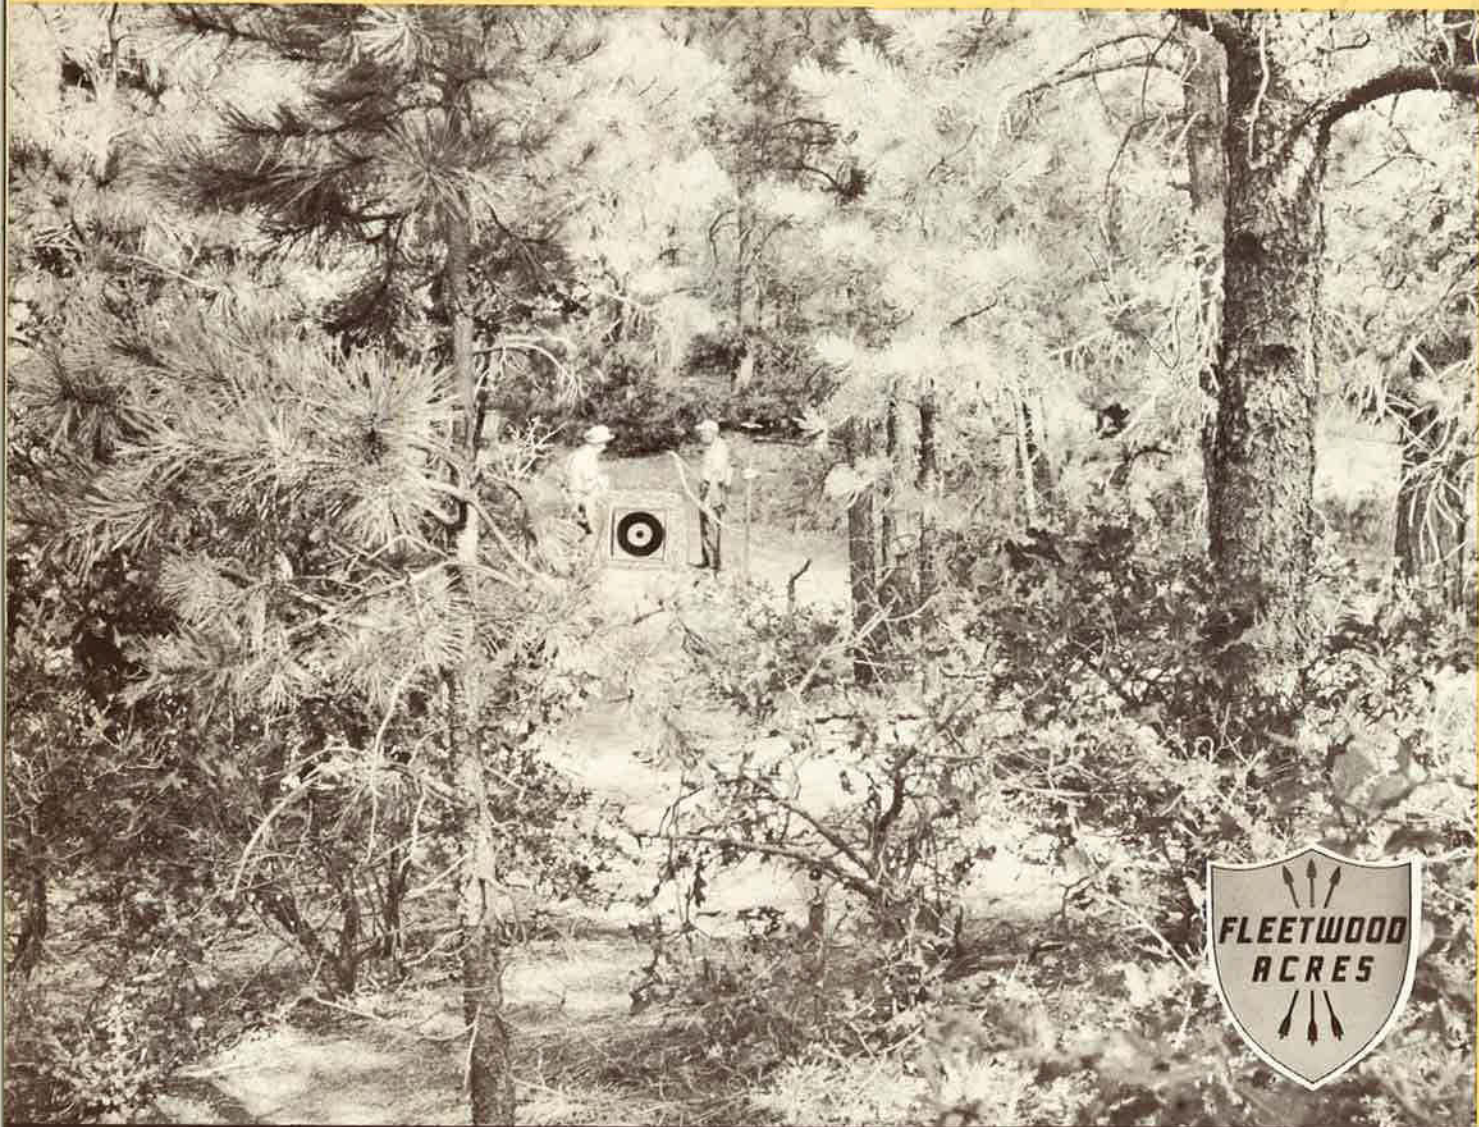

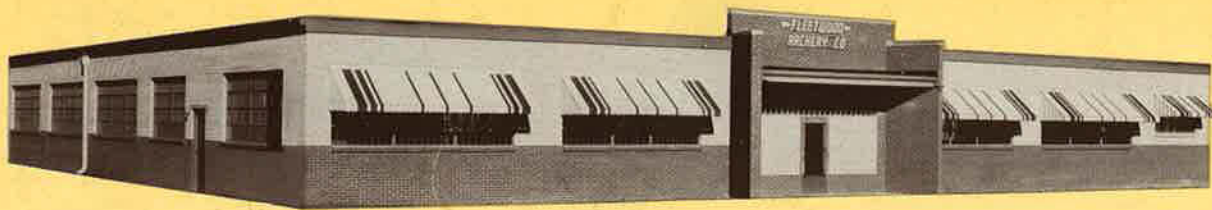

How to order

Your local Fleetwood Dealer will be happy to take as much time and effort as may be necessary to help you select the proper equipment suited to your needs. If no Fleetwood dealer is nearby, write us.

All Fleetwood orders are filled with care and speed. Normally, we can give immediate shipments from stock. During periods of heavy demand our stock may be reduced and at these times, or with special orders, we usually give 4 day service. We try our best to avoid back orders, but there are times when our vendors cannot give us the service we would like.

Please use the speedy Fleetwood order forms when possible. Check your order to be sure you have given us all the information we need to promptly fill your order, including your check, money order, or indicating a COD shipment. Where satisfactory credit references are furnished, net 30 days. Orders are F.O.B. Denver unless otherwise arranged. Please allow for insured parcel post charges; any excess will be promptly refunded.

PRICES ARE SUBJECT TO CHANGE WITHOUT NOTICE.
