

Product Specification Sheet

(Standard Accessories: 1x pulley handle & 3x 0.5 lb. add-on weights.)

Functions:

The RehabPro Mobile Pulley reaches clients that are limited to active exercise in a recumbent position, either in a private room, on a mat in the gym or in a bed on the hospital floor. The emphasis of this item is placed on its mobility, NOT on stability required when clients have progressed to a full weight bearing position. As a result, the M30MP is not offered with resistance higher than 30 lbs. The progression, when indicated, is the RehabPro Standard Pulleys which offer greater stability, higher resistance and longer rope excursion.

Specifications:

Vendor Parts Number: M30MP

Construction:

1:1 weight-to-resistance ratio weights stack. The weight stack consists of 2x 1.25 lb. weights plates (weights one and two) and 11x 2.5 lb. weight plates below. The starting resistance is 1.25 lbs. The weight stack contains sound reducing weight bushing.

The pulley is TIG welded and made of durable, powder coated high strength steel.

The 5/32" non-stretchable marine rope adjusts in height and length along a 66" - 2" interval rope adjustment bar w/ spring-loaded plungers.

The pulley comes with 3/4" solid steel, chromium plated, self-adjusting guide rods ensuring smooth tracking of the weight stack.

Assembly: None required.

Product Dimensions:

M30MP: 28" (W)x 30" (D)x 68" (H), 75 lbs.

Shipping Dimensions:
