

## Capability Statement for CASE Consultants International

---

CASE Consultants International applies climate arts & sciences expertise to inform real-world decisions in climate adaptation, mitigation and resiliency. CASE associates tailor climate services from short term tactical to long range strategic planning. CASE connects science to solutions.

### Our Services:

---

CASE works collaboratively with our projects' partners and brings targeted resources to the climate related issues our clients face. We begin every process to determine the climate-related aspects of the issues they face by asking: What does the science say? Why is the science important to our client? How does the science affect our client's future? Collectively CASE associates:

- Assess climate impacts on adaptation and mitigation strategies for the private and public sector.
- Apply research, data analytics and proven science to create new responses and solutions.
- Engage robust data visualizations to communicate complicated information and drive understanding.
- Interpret the latest climate findings, integrating with R&D in physical, social and applied sciences.
- Evaluate and validate climate data to deliver an authentic voice in climate information.
- Facilitate the use of climate information for organizational strategic planning.

### Our Expertise:

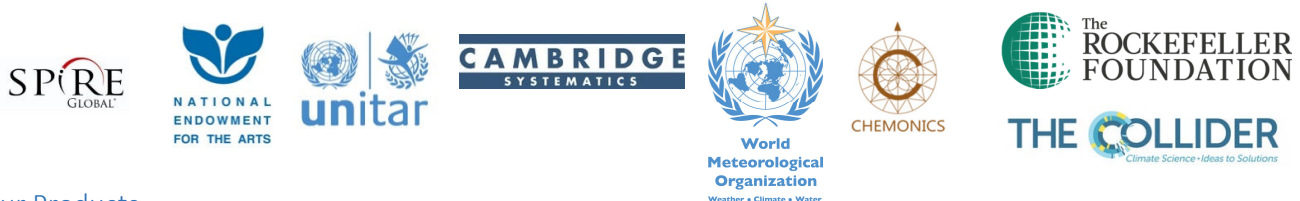

---

CASE operates as an affiliated consultancy, with seasoned practitioners and accredited professionals. The combined expertise of our associates supports a wide range of climate sensitive ventures. CASE assists urban planners, public health professionals, water and natural resource managers, emergency management officials and designers of infrastructure and architecture as they plan for extreme weather and climate variability. CASE mainstreams climate knowledge into practice. Some areas of expertise:

- International environmental logistics and socio-political national security threats
- Public policy development and community engagement
- Environmental ecological economics
- Communication, writing editing and media production
- Urban planning, disaster preparedness, risk assessment and climate change scenarios

### Sample Customers

---

### Our Products

---

CASE associates produce analysis, advice and products, tailored to meet client's needs, efforts such as:

- Public health and vector borne diseases such as at ZikaZoneUSA.com
- Climate variability and change impacts on transportation infrastructure for TRB
- Sustained assessments and strategies with USGCRP government agencies
- Continuing education for professional societies in climate-sensitive sectors
- National and Global Frameworks for Climate Services
