

Executive Secretary

Michigan Public Service Commission:

Re: Case No. U-17053

I believe my analog meter is NOT broken, does not need repair or servicing and the Smart Meter is a New Product which I do not want to pay for, something I never ordered, contracted for and is not mandatory according to the 2005 Energy Act!

Specifically I do NOT want to be punished for refusing to have a Smart Meter by fines, court cost, legal fees and the DTE OPT OUT penalty of \$87 and \$15 a month for services I already have, just because DTE wants to make a bigger profit at my expense!

This is UNLAWFUL under Michigan's Consumer Protection Act P.A. 331 of 1976; I do believe!

I do not want this health damaging/cancer causing unit on my home. It is a threat to my family's health and happiness. I also support my 4th amendment rights to privacy which this violates in massive form.

The Smart Meters are not UL approved, which poses a risk of fire to my home as well, and possible damage to my existing appliances and electronics.

Please END The FORCED Smart Meter MANDATE to Invade my home!

Thank you,
