- Tandem axles on 16' to 30'; Triple axles on 32' & up (7K or 8K depending on width); These are base specs. Axles can be set for any hauling needs or payload

Gooseneck Stock Trailer Model 8127

FEATURE	FUNCTION	BENEFIT
All-Aluminum Construction	Featherlites are made with an all-aluminum frame and skin.	With just routine maintenance, aluminum construction has higher resistance to rust and corrosion and in the long run, they hold their value longer. It's also lighter weight, increasing your payload capacity and making for a smoother tow. Starting with 2017 models, Featherlite's stock trailers are built with sidewall extrusions that are thicker, allow for stronger welds and vertical tie ring integration and are more scratch resistant.
Uni-Body Design	All components of the Featherlite stock trailer from side posts to roof rails to roof bows to crossmembers are engineered into a uni-body design.	The uni-body design makes the trailer stronger and more durable for the long haul.
Crossmembers	4" crossmembers run every 12" under the trailer	Featherlites have a solid support system underneath the trailer for your heavy loads of livestock.
Aluminum Floor	Featherlite's skid resistant interlocking extruded aluminum floor is standard.	The aluminum floor is stronger & more durable to last longer through heavy use when hauling livestock.
Center Gates	Full swing center gate with slam latch is standard. Depending on floorplan, choose from 1, 2 or no gates depending on sorting needs.	Aluminum slam latch on center gates allows gates to be shut quickly & easily for convenience and safety when you're loading livestock. Featherlite's new slam latch design is even stronger and easier to use for you and your livestock's safety.
Tapered Fenders	Tapered fenders inside trailer are standard.	Tapered fenders reduce opportunities for sharp edges, keeping livestock safer during loading.
Aluminum Running Boards	The running boards on Featherlite livestock trailers feature a full-length, one-piece design. These are standard on 7' and 7'6" wide Model 8127s.	The running boards have a consistently wide platform over the length of the trailer. They are durable and hold up to repeated use in the toughest of conditions.
