

C4ISR / UAS

SOLUTIONS

Our Command, Control, Communications, Computers, Intelligence, Surveillance and Reconnaissance (C4ISR) teams offer expertise in complex intelligence and communications programs. Our Unmanned Aerial Systems teams collect data and perform data management and fusion through a custom designed, turn-key intelligence center based on the C4ISR principles and intelligence doctrine.

CAPABILITIES

We provide commercial and Federal agency solutions spanning command and control, communications, and information, surveillance, and reconnaissance including:

- ✓ Aerial data collection and management, sensor integration, imagery analysis / visualization, actionable intelligence, unmanned flight operations, and policy, exemption, and course of action support
- ✓ Data and imagery tools
- ✓ Multiple user interfaces, mobile applications, and visualization tools
- ✓ Multiple geographical areas nationwide, imagery collection, data processing, software development, GIS, data management, and field operations
- ✓ Image conversion, content management, document imaging, and image analysis

CUSTOMERS

Commercial & Federal Customers

n-Link has a premier suite of imagery processing and GIS tools, in conjunction with software experts in their applications. Our C4ISR and UAS experts in flight planning and execution of aerial survey across multiple industries.

We bring expert knowledge level in the system integration and operation in multiple industry leading sensor applications and are FAA compliant. We offer turn-key programs (Regulation, Collection, Product Development, and Delivery), which enable managers to easily view different data sets covering specific locations.

CASE STUDY

n-Link provides data visualization tools within the intelligence space that are used to manage sophisticated collection requirements and priorities. We oversee the data formatting, transmissions, analysis, automation, and accessibility. We successfully process and automate data to intelligence centers so that it can be used by teams to make critical decisions in near real time.

CORPORATE SUMMARY

Services Overview

C4ISR / UAS

Aerial Data Collection/Management, Sensor Integration, Imagery Analysis/Visualization, Actionable Intelligence, Unmanned Flight Operations, and Policy, Exemption, and Course of Action Support

Information Technology & S/W

Network Operations Centers, Website & Portal Development, SharePoint / Collaboration, Knowledge Management, Wireless Design/Implementation, Open Source Software, J2EE, .NET, Agile, and Mobile Applications

Enterprise Architecture

MEGA (a tool Suite) Certified, Organizational Artifact Repositories, As-is and To-be Transitional Modeling, Requirement Management, and Federal Enterprise Architecture & Systems Development Life Cycle Methodology Experts

Cyber Security

Security Operations Centers, Deep Web/Dark Web Monitoring, Penetration Testing, Certified Ethical Hacker certified, Federal Information Security Management Act / Federal Risk and Authorization Management Program, Risk Management Framework, Certification and Accreditation, and Disaster Recovery

Program Management

Project Management Office Support, Requirements Development, Financial Management / Budgeting, Risk Management, Systems Engineering and Technical Assistance / Independent Verification and Validation, and Earned Value Management

Training/Human Performance

Training Facility Management, Instructional Design, Content Delivery, Classroom Training, and IMI/Distributed Learning

Identity Management

e-Authentication, Public Key Infrastructure/Personal Identity Verification, and Homeland Security Presidential Directive-12
