

My doctor has ordered a special medical test for me.

Because we are all staying safe, this test might happen right in the car, or I might drive to a special place.

For the appointment, staff will drive me to the testing spot. Because we are all staying safe, I will need to wear a mask in the car. Staff will wear a mask too!

Staff and I will might wait in a line of cars for the test. I might have to wait a long time, but staff will help me be patient so I can get his test. Both of us should keep our masks on!

When it's my turn, I will meet with someone wearing medical equipment such as gloves, a mask and a gown.

For the medical test, the person in medical equipment will need to place a cotton stick in my mouth or nose. This is quick and does not hurt. I will need to let the medical person rub the cotton stick in my mouth or nose.

As soon as the medical people get the information they need, I can go back home!
