Mole removal, wrinkle eliminating fillers, tummy tuck, laser resurfacing, chemical peels, stem cell facelifts, epidermoid cyst, hair transplant, laser hair removal, breast enhancement, liposuction, scarless rhinoplasty, spider vein removal, lipomas and more, Beverly Hills Cosmetic Surgeon Dr. Kathy Gohar, founder of the Beverly Hills Cosmetic & Laser Center and Innova Surgical Institute of Beverly Hills understands that the better we look, the more self-confident we feel. Dr. Gohar is a graduate of UCLA and Chicago Medical School where she trained extensively in General Surgery and Cosmetic Surgery. Her med-spa and surgical center offer a one-stop, anti-aging, laser and cosmetic surgery facility renowned for advanced face and body makeovers. Innova Surgical Institute of Beverly Hills stands for Innovations and Advancements in the art of Cosmetic Surgery.

**Fraxel Restore & Repair laser:** “This laser is an effective 1-2 treatment to reverse signs of aging, eliminate acne scars, stretch marks, soften wrinkles around the eyes, lighten/eliminate age spots, sun damage, irregular skin pigmentation, and rough skin, while lightening and tightening skin. Fraxel is one of the most popular laser procedures. I use it to treat Melasma which previously was impossible to treat. Melasma can be caused by pregnancy, birth control pills and menopause. Fraxel stimulates collagen offering a clinically proven, non-invasive skin rejuvenation impossible to achieve with topical creams, or the lengthy downtime of conventional bulk ablative lasers. Results are dramatic! It tightens your skin, eliminates scars and wrinkles, and age spots without the need of a face lift!”

**Non-Surgical Rhinoplasty:** “There’s an art to performing scarless rhinoplasty to improve the size and shape of the nose. I believe that successful rhinoplasty is based on making certain a nose fits the size and shape of a patient’s face. When it doesn’t, the patient is left with a face that looks off balance. Carefully contouring cartilage and bone to be in harmony with a face, results in aesthetic perfection. Rhinoplasty isn’t only intended for a nose to look better, but function better by correcting nasal trauma, congenital defects, and sinus problems that cause difficulty in breathing. My Non-Surgical

rhinoplasty offers a scarless result as incisions are placed inside the nose which carries a lower risk of edema, and quicker recovery!”

**Getting rid of fat without surgery and body enhancement:** “Treatments for eliminating fat without surgery are melting/freezing fat with Liposonix and Cool Sculpting; both are non-invasive, effective and safe with no downtime. I help moms regain a pre-pregnancy figure with scarless liposuction and a tummy tuck, or breast augmentation to achieve a patient’s desired look. For spider or varicose veins, I use Ultimate Laser to remove the purple vascular patches on legs or telengectasia on the face. My patients say I have a magic wand to treat everything. Over time I’ve come to believe them!”

Dr. Gohar works six days a week making herself available for consultation. Beverly Hills Cosmetic & Laser Center and Innova Surgical Institute of Beverly Hills have emerged as a leading skin and body resurfacing facility.
