## Recommendations to all visitors to Arenal Volcano

- \* Through the years this has been an active volcano. Frequently it has experimented explosions with incandescent rocks, ashes and lava. These eruptions are very spectacular but should be observed from far away to avoid accidents.
- \* Do not trespass the shown limits.
- \* If you notice any abnormal activity, please move away from the area and report it to the nearest authority.
- \* In case of an eruption, please move away and avoid inhalation of gases and dust by using a wet cloth over your nose and mouth.
- \* Please follow and obey all indications from the competent authorities.
- \* Do not pay attention to rumors or stories which frequently are told regarding the volcanic activity.

## Dear Tourist:

For your safety, upon leaving your vehicle, please lock all doors and take all of your valuables with you.

**Please leave your car BACK IN.**
