Cost-effective Stretching Frames Fabricated for Box Trucks and Trailers with the TS23 Extrusion.

TS23 Extrusion

Our tension frame system, based on the TS23 extrusion, is chosen for box trucks and trailers projects for the following reasons:

- 1) Impeccably stretched vinyl banners (See photos hereafter)
- 2) Easy to change printed graphics
- 3) Unbeatable cost per foot.

A great, low-cost and simple solution for truck fleets.

You can see the perfect stretch of the printed vinyl. Goodbye to rivets, bars, etc and hello to easy graphic changes. Our Banner stretching system works fine even for non-rectangular frames, use the entire side of your truck, as shown on these photos.

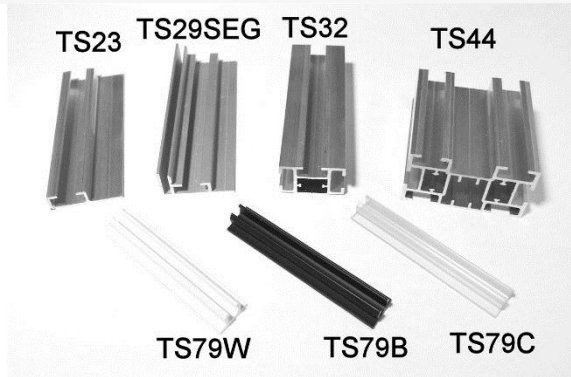

Let's talk cost:

(Material cost for two 7' x 15' frames - both sides of the truck - \$497.00, including shipping on Continental US)

***Or less than \$250.00 per banner stretching frame delivered to your shop!
