

Kitty

We brought Kitty into our home late September: she came clear from Nebraska, to Missouri and then to St. George, KS. She currently lives with a family of 5 and has really bonded with our Brussels Griffon, Russo and doesn't know what to do when he is not around.

She enjoys being groomed each and every day and doesn't mind her new feeding schedule. We couldn't get her to eat for the very first few days but

we just gave her a little yogurt and she began snarfing her food down (our vet suggested giving yogurt on our dog's foods as it helps strengthen their immune system). She now eats her food either way.

After having Kitty for a few weeks she has really bonded with Brent (my 16 year old brother). We have noticed she doesn't like to play with toys. We have tried a football, frisbees, squeekie toys, everything and she doesn't play with them, not even sticks! I guess she isn't too bored haha! One thing Russo and she love doing is

lying in the backyard all day together and running up and down the hill chasing one another. Usually Kitty wins by chasing Russo until he is tired but the other day it was the other way around. Russo chased Kitty! Pretty funny!!! We did find that her and Russo play a game together. He buries the bones in the yard and a couple days later she will dig them up and chew/eat them herself! Such a funny sight to see them helping each other and partnering in crime!

We just love Kitty and are so glad we were able to bring her into our home. I feel that later in life I will definitely adopt another Newfoundland as well. Thank you HANR!
