This is the “broker”, “distributor”, or “middle man”  
 She has violations too...read on.

This is the 7<sup>th</sup> “breeder” that Heartland Pets uses that we have investigated, and it is also the 7<sup>th</sup> puppy mill that we have uncovered.

Heartland employees will use “pet store doublespeak” make you believe that their puppies aren’t from mills.

This “breeder” has 93 adult dogs and many violations.  
 Heartland enables a vicious cycle of animal cruelty by financially supporting breeders like this one

Ask Heartland to work with local rescues – ask them to go humane.

3338 430th Street  
Orange City, IA 51041

Customer ID: **8911**  
Certificate: **42-A-1054**  
Site: 001  
A.G. BEUKELMAN

Type: ROUTINE INSPECTION  
Date: Dec-02-2014

**3.1** (c) (1) (i) **REPEAT**

**HOUSING FACILITIES, GENERAL.**

In the building housing the large breed dogs, one enclosure, affecting one dog, has sides constructed of metal bars that are showing excessive rusting. The rust causes flaking and pitting of the metal and does not allow for proper cleaning and sanitization of these metal bars. All rusty metal must be replaced or altered in a manner that allows for it to be properly cleaned and sanitized every two weeks.

**3.6** (a) (2) (i) **REPEAT**

**PRIMARY ENCLOSURES.**

In the building housing English Bulldogs, the enclosures are constructed of wire floors and wire sides. Three enclosures, affecting three dogs, had wires on their sides that are broken and creating sharp points at the level of the dogs. Sharp points pose an injury risk to the dogs. All sharp points must be removed or altered in a manner that eliminates the injury risk towards the dogs and licensee must establish a maintenance plan for the enclosures to ensure they remain safe for the dogs. The licensee removed all broken wires and sharp points from the enclosures during the inspection.

**3.9** (b) **REPEAT**

**FEEDING.**

In the first room of the building housing English Bulldogs, eight metal self feeders, affecting eight dogs, have a buildup of dirt and grime on them. Food receptacles must be kept clean in order to prevent food contamination and protect the health of the animals. Licensee must ensure that all food receptacles are cleaned and sanitized every two weeks or as often as necessary, to prevent the buildup of dirt, grime and other contaminants.

**3.11** (b) (2) **REPEAT**

**CLEANING, SANITIZATION, HOUSEKEEPING, AND PEST CONTROL.**

In the building housing large breed dogs, two enclosures, affecting four dogs, had the plastic frames around the access doors chewed and damaged by the dogs. This damage allows dirt and grime to penetrate the surface of the plastic and the frames can no longer be properly cleaned and sanitized. All chewed and damaged plastic door frames must be replaced or altered in a manner that allows for proper

Type: ROUTINE INSPECTION  
Date: Sep-11-2014

**3.1** (c) (1) (i) **REPEAT**

**HOUSING FACILITIES, GENERAL.**

In the building housing the large breed dogs, some of the enclosures have sides constructed of metal bars that are showing excessive rusting. The rust causes flaking and pitting of the metal and cannot be properly cleaned and sanitized. All rusty metal needs to be replaced or altered in a manner that allows for it to be properly cleaned and sanitized every two weeks.

**3.6** (a) (2) (i) **REPEAT**

**PRIMARY ENCLOSURES.**

Throughout the building housing English bulldogs, the enclosures are constructed of wire floors and sides. Seven enclosures, housing a total of seven bulldogs, have wires on their sides that are broken and twisted inward toward the dogs. In two enclosures, housing a total of two bulldogs, the floor has broken wires that are twisted upwards toward the dogs. These sharp points pose an injury risk to the dogs. All sharp points must be removed or altered in a manner that eliminates the injury risk to the dogs and the licensee must establish a maintenance plan for the enclosures to ensure they remain safe for the dogs.

**3.9** (b) **REPEAT**

**FEEDING.**

Throughout the building housing English bulldogs, the feeders have a buildup of dirt and grime on them. Food receptacles must be kept clean in order to prevent food contamination and protect the health of the animals. Licensee must ensure that all food receptacles are cleaned and sanitized every two weeks or as often as necessary to prevent the buildup of dirt and other contaminants.

**3.11** (b) (2)

**CLEANING, SANITIZATION, HOUSEKEEPING, AND PEST CONTROL.**

In the building housing large breed dogs, the plastic water buckets have been excessively chewed by the dogs. The plastic frames around the access doors have also been chewed by the dogs. This damage allows dirt and food debris to penetrate the surface of the plastic causing the buckets and door frames to

**2.40** (b) (2)

### **ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).**

In the kennel there are two bottles of Specto-Gard that is labeled for use in pigs. The licensee stated she uses it on the puppies when they have loose stool.

This drug is not labeled for use in dogs, and the licensee did not have the dosing instructions from a veterinarian concerning the safe use of this medication in dogs. There must be a clear understanding between the attending veterinarian and the licensee about the medications that are being used in the facility to ensure they are being utilized correctly.

The licensee must obtain dosing instructions from a veterinarian for all medications utilized in the kennel that are not labeled for use in dogs, to ensure that the medications are dosed safely and to protect the health of the animals.

To be corrected by July 31, 2014.

The exit interview was conducted with the licensee.
