Our Education Philosophy and Goals

Pitter Patter Academy & Pitter Patter Petite Academy takes pride in the education that each child receives while in their care. It has been asked “When is a child ready to start learning?” Some say Kindergarten or first grade, but in fact children are learning from the day they are born. Infants begin learning by actively listening to the spoken language, laughing, singing and different sounds from family members and friends. As the child enters into the toddler stage they begin to understand that print has meaning. When a toddler is being read to they begin to notice the relationship of the printed word with what is being said and the picture. As the child grows they observe people reading newspapers, magazines, and books with a purpose to gain information. Experience and exposure are the building blocks that children need to help them learn pre-reading and pre-writing skills.

Our emphasis on increasing language skills and knowledge helps each child gain the ability to read at an earlier stage. Each classroom is organized to encourage children to explore, participate and learn through creative activities. The curriculum is age- appropriate and at the developmental level of the children. Through routine and repetition, basic letter identification and their sounds are learned then expanded on throughout the day with activities using gross and fine motor skills, art projects, music, read aloud, and interactive games and puzzles. The daily adventures begin in our toddler rooms and continue through pre-k. Expanding a child’s vocabulary will ensure their success when learning how to read and comprehend.

Some examples for each classroom:

- An abundance of books that the children can handle and look through.
- Areas for different activities to explore such as art, science, math, manipulatives, construction, music, etc.
- Ample amount of writing materials such as paper, pencils, crayons, & markers.
- Interactive letter: cards, magnets, stamps, stencils, lacings, & puzzles
- Classroom objects labeled with words and picture, signs, posters to show the meaning of print
- Read aloud are interactive with a lesson to enhance listening skill, vocabulary, word identification, sequencing, and basic book awareness
- Communication skills are practiced by modeling and helping children communicate their wants and need to each other appropriately.

See individual classroom goals, philosophies, and expectations to see what your child would be receiving from our care.

Clothing Suggestion

In order for your child to enjoy participation in the program, please have him/her dressed for the weather. If it has rained, please send boots for puddles, if it snows, please send in snow pants, hats, mittens, and boots, etc. Please label all clothing.

If the day is extremely cold, please send in an extra sweater and hat, we will be going outside even if it is only for a few minutes. Children really need the fresh air and to run around doing some gross motor activities daily. Our consultant pediatrician says that if a child is well enough to come to school the child should be able to go outside as long as he or she stays dry. Therefore, we ask you leave a complete change of clothing including socks, at all times. Please replace the items as soon as they are used. Again please be sure all items are labeled.

We appreciate your cooperation.

Oral Health Non-Participation Form

In January 2010, EEC issued new regulations for child care programs that include a requirement that educators assist children with brushing their teeth if children are in care for more than four hours or if children have a meal while in care [606 CMR 7.11(11)(d)]. This regulation is intended to:

- Help children learn about the importance of good oral health
- Provide information and resources regarding good oral health to child care programs and families
- Help address the high incidence of tooth decay among young children in Massachusetts, which is associated with numerous health risks.

EEC licensed programs must comply with this regulation. However, parents may choose that their child (ren) not participate in tooth brushing while present at the child care program.

You do not need to fill out this form to have your child(ren) participate in tooth brushing while they are in child care. However, if you do not want your child to brush his or her teeth while s/he is attending the child care program, please fill out the information found below. A separate form must be filled out for each child in care. This form must be renewed annually and will be kept in your child's record at the program. Should you change your mind and wish for your child to participate in tooth brushing, this form may be withdrawn at any time by requesting in writing that it be removed from your child's file. Thank you.

I **do not** wish to have my child participate in tooth brushing while in care at

Policy and Procedure for Handling Biting

Biting is a common issue in the toddler room due to several reasons:

1. **Teething:** Most toddlers acquire their first molars between 12 and 18 months of age and may bite to relieve teething pain.
2. **Cause and effect:** Toddlers also bite because of their fascination with the process of “cause and effect”. What usually happens when a child bites? A loud noise occurs and people rush around.
3. **Attention:** Many toddlers bite to seek attention. Children quickly learn that this negative behavior produces a great deal of attention and even negative attention for a child is better than no attention at all.
4. **Express frustration:** Toddlers lack the verbal skills necessary to express themselves therefore, biting is quick and easy way to show their frustration.

Steps to solving a biting problem

1. Determine why the child is biting.
2. Examine the classroom for ways to reduce the frustration level.
3. There should be limited waiting time (with nothing to do)
4. Avoid the crowding of children.
5. Provide enough activities, toys and materials.
6. Have multiples of favorite toys.

How to handle situation when biting occurs

1. Comfort the victim immediately.
2. Clean the bitten area and apply ice.
3. Remove the biter from the group.
4. Remind the biter that the child is crying because his/her teeth hurt him/her.

The parent of the victim will receive a phone call and an accident report (at pickup). The parent of the biter will receive an incident report. These reports must be signed. A copy can be given to parents upon request. The original copy of the incident & accident report must be passed into the office to be filed. It is the policy of Pitter Patter Academy & Pitter Patter Petite Academy not to reveal the name of the child.

If it is determined by management that the biting is more than normal toddler behavior, implementation of the termination policy will be discussed and considered while trying to meet the needs of all concerned.
