2014 – 2015 Officers

DARBY HOWARD, P.E.
Trustee
JDH Corrosion Consultants, Inc.
(925) 927-6630
DHoward@JDHCorrosion.com

MOHAMMED ALI, P.E.
Chairperson
JDH Corrosion Consultants, Inc.
(925) 927-6630
correngineer@aol.com

MONGKOL MAHAVONGTRAKUL, P.E.
Vice Chairperson
San Francisco PUC
(415) 551-4890
mmahavongtrakul@sfwater.org

MICHELLE ANDERSON
Secretary
Corrpro Companies
(510) 381-1414
mlanderson@corrpro.com

LARRY WONG, P.E.
Treasurer
Santa Clara Valley Water District
(408) 265-2600 X2983
lwong@valleywater.org

DAN DAY
Editor-in-Chief
V&A Consulting Engineers
(510) 507-0013
danday94@pacbell.net

BILLY CAMPBELL
Membership Chairperson
Billy Campbell Technical Services
(415) 637-5027
nacethreeinspector@gmail.com

RAMAN SINGH, P.E.
Communications
San Francisco PUC
(415) 551-4512
rsingh@sfwater.org

ELMER CHEUNG, P.E.
Webmaster
San Francisco PUC
(415) 551-4890
echeung@sfwater.org

Date	Location
Tuesday, May 12th	Zio Fraedo's Restaurant 611 Gregory Lane, Pleasant Hill, CA. (925) 933-9091

Time: No Host Bar 5:30 pm • Dinner 6:30 pm • Program 7:15 pm
Cost: \$15 NACE members, NACE retirees and students
\$25 non-members

Please RSVP by Thursday, May 7th by email to Michelle Anderson at mlanderson@corrpro.com, or by phone at (510) 381-1414.

*To insure affordable gatherings, please plan to pay the dinner fee when you attend the no-host bar portion of our program.
Cancellation deadline is Friday, May 8th.*

Location / Directions: Please see attachment "Meeting Location"

Viscous Elastic Coating and Sealants

John Glass, Vice President of Sales
Amcorr Products/VISCOTAQ

Viscous elastic coatings easily overcome many the common issues that cause traditional coatings to fail. They offer immediate adhesion without the need for primer, require minimal surface preparation, and form a homogenous, continuous, self-healing protective layer. The chemical components bond intimately to create a waterproof, impermeable coating that can operate over a wide temperature range. Viscous elastic chemistry is designed to give the applied coating excellent wetting characteristics, which allow the uncured coating to flow into the pores and surface irregularities of a substrate. Viscous elastic coatings always remain in a semi-solid state, providing high impact strength and sheer resistance. Ease of application and outstanding performance make these coatings an excellent corrosion prevention technology. These products are available in roll form, as a paste/putty, and as a cartridge-applied sealant. They offer protection in numerous applications including pipeline soil-to-air transitions, flanges, casings, girth welds, waterproof casing end seals and pipe vaults.

John Glass is a graduate of University of Tennessee with a Bachelor of Science degree. After college, he spent 10 years building a business in Tennessee before selling it, relocating to California and joining the corrosion industry. In the Spring of 2009, he teamed up with Amcorr Products & Services, Inc. to launch the VISCOTAQ Product line. Over the last four plus years John has tirelessly traveled the country introducing the VISCOTAQ product. He has made numerous presentations on Viscous Elastic Coatings and Sealants at conferences throughout the US, Canada and Europe. Currently, he is in charge of business development and sales for Amcorr Products & Services in the United States.
