invites applications for the position of:

## **ENEG09-2022-04272-Gas Engineer- Cheyenne**

---

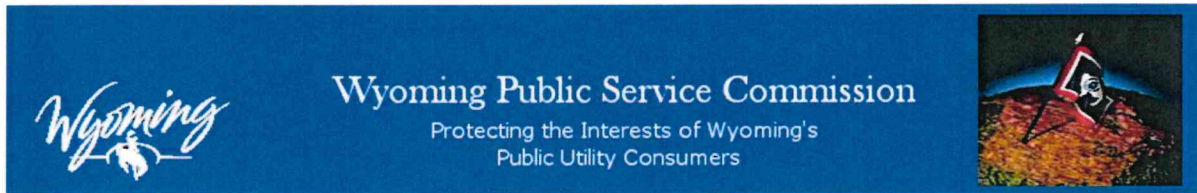

**SALARY:** \$27.33 - \$34.16 Hourly  
\$4,737.20 - \$5,921.07 Monthly

**LOCATION:** Cheyenne

**OPENING DATE:** 08/24/22

**CLOSING DATE:** Continuous

**DESCRIPTION AND FUNCTIONS:**

**Open Until Filled**

### **GENERAL DESCRIPTION:**

Inspect and technical engineer analysis of natural gas utilities and intrastate natural gas pipeline operators to ensure jurisdictional utility and pipeline facilities meet applicable state and federal codes as defined in 49 CFR §§ 40, 191-193 and 199; technical engineer analysis; analysis and audits operations and facilities; communicates violations of codes to utility operators, and ensures effective corrective action is taken. This position performs audits, inspections, and technical evaluations to determine compliance with minimum safety requirements and ensure operators comply with Commission Rules to provide safe, adequate, and reliable utility service. This position does not have supervisory responsibilities but may have input into the agency's FED budget. This position also works with other agency staff to analyze complex utility applications to build new infrastructure before the Commission and maintain databases. Provide technical advice/recommendations to the Commission on natural gas Certificate of Public Convenience and Necessity Applications, rate cases, and tariff filings. Perform essential natural gas-related engineering work on assigned cases. Conduct research on technical engineering matters before the Commission and federal regulations

**Human Resource Contact:** Alice Saldana - [alice.saldana2@wyo.gov](mailto:alice.saldana2@wyo.gov) - 307-777-7667

**ESSENTIAL FUNCTIONS:** The listed functions are illustrative only and are not intended to describe every function which may be performed at the job level.

- Inspection and technical engineering analysis of natural gas utilities, intrastate natural gas transmission pipeline operators, Liquified Natural Gas (LNG) operators, Regulated Natural gas gathering operators, and Liquified Propane Gas (LPG) operators' gas distribution, transmission, and other regulated facilities to determine compliance with the appropriate Federal and State Safety Regulations.
- Conduct or participate in Program, Standard, and Construction pipeline safety inspections as the Lead or Inspector.
- Conduct engineering Incident Investigations of pipeline safety incidents.
- Provide timely reports of possible violations of the pipeline safety regulations and the severity of the violation.
- Work with utility, pipeline, and facility operators to ensure the safe operation of jurisdictional facilities as defined in Federal regulations 49 CFR §§ 40, 191-193 and 199, Wyoming regulations and statutes, and the Commission's Rules and Regulations to ensure safe, adequate, and reliable service.
- Engineering investigations of underground facility damage to determine the cause and provide recommendations on possible Civil Penalties as outlined in W.S. 37-12-301 through 306.
- Conduct engineering analysis on operator facilities. A minimum number of inspection days are required to meet Federal and Commission Strategic Plan requirements.
- Make engineering recommendations as a result of facility inspections.
- Appear before the PSC to deliver results of inspections and make recommendations, providing technical guidance and recommendations for operator compliance.
- Participate in One Call, NARUC, NAPSAR, and other natural gas safety committees in Wyoming, regionally, and nationally.
- Provide technical advice/recommendations to the Commission on natural gas Certificate of Public Convenience and Necessity Applications, rate cases, and tariff filings.
