

Important Notice to the Residents of The Marquis

The elevator modernization of the **North Elevator** is on scheduled and barring any last minute surprises will be available for your use by mid-April as planned.

Work will then start on the South Elevator.

We advise further that Fujitec, our elevator service provider and the firm that was awarded the elevator modernization contract, will be testing the **North elevator's** operation periodically over the next 3 weeks to work out any minor issues starting on.

Monday March 25, 2019

Although you may see the elevator door open, the inside lights turned off, a barrier placed inside the elevator cab and caution tape placed over the elevator entrance, please do not enter it as the system is being tested and this elevator will not deliver you to your desired location.

You will be able to continue using the South Elevator as the testing on the North Elevator will not interfere with its operation

Project updates and the work schedule are posted on The Marquis website **www: marquismatters.org** and the digital notice boards as soon as additional information becomes available.

We thank you in advance for your patience and understanding during this period.
