

***Medicine:
Technology vs. Teleology***

Technology knows
how;
teleology asks:
Why?

Technology calls upon
chemistry and biology.
teleology invokes
ethics and morality.

Technology shows what
can be done;
teleology seeks what
should be done.

Teleology is not opposed
to technology;
it just wants
to guide it.

Technology likes
laboratories;
teleology regards
persons.

Technology and science are
the motor and accelerator;
ethics and morality are
the brakes and steering wheel;
teleology holds the key
to the ignition.

Technology needs
to experiment;
teleology cautions:
not with people!

Technology, therefore,
is allied with
science;
without teleology
it degenerates into
scientism.

Technology's focus is
knowledge;
teleology's concern is
health.

Technology applies
procedures;
teleology supplies
values.
