A NOTE FROM MARK

On this amazing journey through exotic Bhutan, we are going to focus our cameras on one of the most off-the-beaten path countries on earth. During this photo tour we will use the necessary techniques to create cohesive professional travel stories, using images that go far beyond “I was here” photographs. The goal is to come away with a cohesive story told through a series of dramatic photographs.

Successful travel photographers must wear more hats than perhaps any other photographic genre. As you’ll see, in a single travel photo essay we are at times landscape photographers, architectural photographers, food photographers, and portrait photographers. The list goes on to encompass almost every possible type of photography.

From the dozens of workshops I’ve taught, the hundreds of photo assignments I’ve completed, and talking with many of the great globetrotting lensmen and women I’ve interviewed, I have developed a methodology that, when applied, should yield impressive and at times spectacular results.

Both photographers seeking to have their work published and those who want to document their adventures for friends, family, and themselves can use the ideas and techniques we will be discussing as we explore the wonders of Bhutan. As to why we travel, my friend and occasional collaborator Pico Iyer penned: “We travel, initially, to lose ourselves; we travel, next, to find ourselves. We travel to open our hearts and eyes and minds and learn more about the world than newspapers will accommodate.”

What you will learn:

- 🚩 To tell focused stories through images
- 🚩 Refine your photo techniques under the guidance of an award-winning photographer
- 🚩 How to create dynamic environmental portraits
- 🚩 Editing and naming protocol techniques
- 🚩 Photographers of all levels welcome
