Virtually Together: 41st Annual Symposium for the Kansas Art Therapy Association September 26-27, 2020

The symposium was designed for education of professional art therapists, art therapy graduate students, or allied professionals. The learning sessions in the symposium provide information on skills and strategies for art therapy, however the symposium in and of itself does not equate formalized training in art therapy. Art Therapy is a master's level profession and individuals who are not credentialed art therapists and utilize therapeutic art activities should do so within their scope of practice or in consultation with a credentialed art therapist and should not use the term "art therapy" to describe the activity. There is risk of harm conducting any therapeutic modality, including the creative arts therapies, without the proper training. Further information on becoming a professional and credentialed art therapist can be found at the websites of the American Art Therapy Association and the Art Therapy Credentials Board.

- Use of Art Interventions to Deescalate Elementary Students in Crisis - Anna Brink, ATR-P, LPC, NCC
- Using Bridge Drawings in Addiction Treatment Groups to Promote Personalized Understandings of the Stages of Change - Libby Schmanke, ATR-BC, ATCS, LCPC, MAC
