

Can you appraise my home?

As a home inspector my role is to provide you with as much knowledge about a property as I can impart. Age of systems and how long they typically last are a necessary provision to offer you but the property's value in itself must be qualified by a certified appraiser. Having said that, I have had 10 years experience as a home contractor and can provide valuable insight into costs for repair or replacement of appliances, systems, and parts of the property itself.
