Comprehensive Compliance Solutions
for Healthcare Providers and Business Associates

HIPAA ComplyPAK™ Compliance Management System

The HIPAA ComplyPAK™ provides large and small health related business operations with cost-effective tools needed to manage HIPAA and HITECH compliance. The system includes extensive tools for auditing, monitoring, training, and reporting on compliance activity .

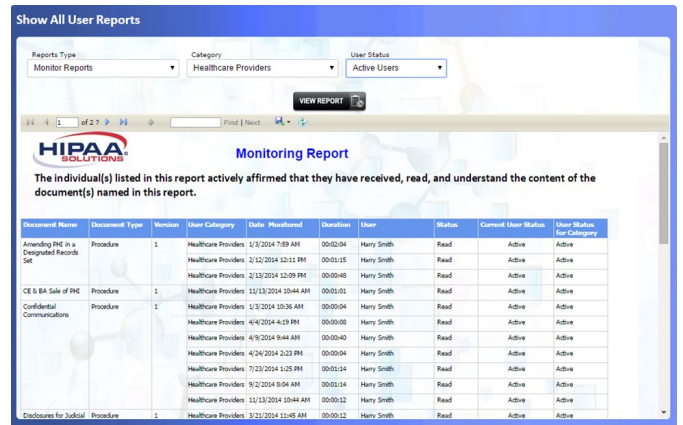

Automated Comprehensive Compliance To Manage and Reduce Risks

- Intuitive screens guide employees in taking actions for job-function specific compliance.
- System provides on-demand reporting on activity of employees related to compliance.
- Protects employees and the organization by giving Privacy Officers tools to monitor and report on activity while ensuring that employees take appropriate actions to address compliance.
- Allows on-demand access by employees for review policies, procedures, and training.
- Requires minimal effort to use the system.
- Web based system accessible from any location.

Monitoring & Reporting

HIPAA ComplyPAK™ includes extensive monitoring and reporting tools to assist compliance officers in managing compliance and to ensure that job-function specific controls including policies, procedures, and training have been implemented and read by employees.

Management Tools

HIPAA ComplyPAK™ includes tools such as the PHI Locator™ and a dashboard for analysis and evaluation of critical compliance activities. These management tools allow compliance officers to strategically identify potential issues with compliance and give the ability to address potential vulnerabilities while reducing compliance risks.
