Driven by performance since 1943.

45th Annual
GENERATIONS
OF PERFORMANCE
Bull Sale

9.13.19 ~ GERBER, CA

TEHAMA

Angus Ranch

DRIVEN BY PERFORMANCE SINCE 1943.

Where
the COW
HERD
makes the
difference.

Dear Friends and Fellow Cattlemen,

As we look to celebrate our 45th Annual "Generations of Performance" Bull Sale we always keep in mind how fortunate we are to be successful in agriculture in this great country. Our daily chores are highlighted by open rangelands, tagging newborn calves, and evaluating previous breeding decisions. Very few individuals are rewarded monetarily for doing what they truly love to pursue each and every day, and for that we are blessed.

Much has changed over the last 10 years in the production of beef genetics and within the Angus breed. Genomic valuation has overtaken phenotypic evaluation and the value of individual data collection. Certain breeders continue to search for the extreme \$ Values only to find genetic downfalls years later. Tehama Angus continues to place the cowherd as our priority. Structure, udders, and fertility will always rank above extreme weights, gigantic rib-eyes, and added fat. One of the highest costs in the beef business is female development, consequentially cow longevity pays in the long run.

We deal with our cowherd each and every day. We do not use cooperator herds and have remained a closed cowherd for nearly 60 years. Our primary goal is to create consistent, easy-fleshing, moderate-framed females that breed within a 50 day season and stay in the herd for many years to come. Females are therefore sold off the bottom end for below average production, frame size, structure, and disposition. These are our beliefs that go hand in hand with the beliefs of our most successful customers.

Tehama Angus continues to make vast improvements in genetics. Last fall we calved as many 2-year old females as ever before with the majority being Tehama sired. They ran in a commercial environment their entire lives and flourished. They are to date the best set of cows to walk on our ranch since the beginning. This year our program is on the same path with the most powerful set of yearling bulls guaranteed to fulfill our goals as well as yours. Furthermore, we continue to offer some unique bloodlines as alternatives to mainstay Angus genetics.

Please call at any time with questions about the sale, the bulls, or the females that stand behind them. We look forward to having you at our 45th Annual "Generations of Performance" Bull Sale. The ranch is always open for visitors to stop by the ranch prior to the sale to view the offering and our cowherd. Please feel free to stop by.

To register and follow the auction in real time on the internet, go to <http://www.liveauctions.tv>
For more information, call Brad Fahrmeier at (618) 392-9241. If you wish to follow the sale on the computer and bid by telephone, please call the sale day phone numbers or one of the consultants listed in our catalog. *We appreciate your attendance!*

Livestock Mortality Insurance: Mortality insurance may be obtained on your purchase at the time of settlement through Harding and Harding, American Livestock Insurance.

Bull Delivery: A \$50 discount per bull if bull is picked up by Monday, September 17. Free delivery west of the Rockies in the Continental U.S.

Inspection of Cattle: Cattle may be inspected at Tehama at any time. Videos of each and every bull are available on Tehamaangus.com September 1st.

Herd Health: All tests required on cattle selling outside of California must be completed prior to shipment. All cattle will be inspected for soundness. All bulls have been vaccinated with 8 way, Bovishield Gold 5 (IBR-BVD-P13-BRSV), Lepto-Vibrio (all Zoetis brand); Warts; Killed Anaplasmosis (2X) and treated with Dectomax. All bulls are tested and free of Bovine Viral Diarrhea PI (BVD PI). In addition, the bulls come from a BVD-free herd.

Catalog design by **Strommen Livestock Services**
Fort Rice, N.D. • (701) 290-3886

Genetic Defects: All bulls in this sale book are either free of the AM, NH, CA and M1 birth defects or are not potential carriers due to ancestry.

Semen Test: All bulls will have a fertility evaluation and will be semen tested by Cottonwood Veterinary Clinic, Cottonwood, CA

Ultrasound for Carcass Traits: Craig Hayes, Critical Insights, Inc., Maryville, MO. Images read by CUP Lab at Iowa State University.

Updated Performance Data: All bulls will be weighed prior to sale day with weight per day of age and other performance information available. For a copy of this data before the sale, please call us at (530) 385-1570 or e-mail us.

Bull Buyer Discounts: A 5% discount for continuing Tehama bull buyers. If you have purchased a bull in our 2018 sale, you will qualify. In addition, any buyer who purchases five or more bulls will receive an additional 5% discount.

Retained Interest: Tehama Angus retains a 25% semen interest and revenue sharing in all of the bulls selling through the 45th Annual "Generations of Performance" Bull Sale. Buyers will receive full possession and full salvage value on all bulls purchased.

Guarantee: Tehama Angus Ranch guarantees bulls to be sound breeders for the first breeding season. If a problem arises, contact us and we will provide a replacement bull if available, or the buyer will be given credit towards next sale. Tehama Angus must be notified before a bull is sold for salvage or a credit will not be given. Tehama does not guarantee against death.

Sale Terms: Cattle will sell under the suggested Terms and Conditions of the American Angus Association (http://www.angus.org/Pub/suggested_sale_terms.pdf). Tehama Angus Ranch, its representatives and sale management assume no liability for accidents or injuries that may occur. Attend sale at your own risk.

Lunch: A complimentary lunch will be served at Noon on Friday, September 13.

Tahoe was our top selling bull in 2014 and leased to Select Sires in 2017 after proving great success in our program. Tahoe combines low birth-weight, exceptional growth, and added carcass merit in a moderate-framed package. Daughters in production are feminine, docile, and nicely uddered. Many of our top-end bulls in this offering are backed by Tahoe sired dams.

Niagara was a highlight of the 2018 sale season with sons topping several sales including our Tehama Patriarch F028 that sold to ABS Global. His pedigree is designed around powerful maternal bloodlines. Progeny are smooth made, travel easily, and have an EPD profile that does almost everything that you can ask for.

Command progeny have stood out from day one. They possess a great amount of shape and eye appeal while reading well on paper. Bulls are flat-topped, moderate made and have a massive hind-quarter. Command has been plugged into our program for the last three years with many more bulls to sell in the future.

Advancement was a high-selling bull in 2017 to Biddick Inc. We used him for his individual phenotype and the Earnan donor cow that stands behind him. His dam B705 is possibly the best cow on the ranch raising 4 calves at a 109 weaning ratio, remaining a donor, and keeping a calving interval of 369 days earning her Path-finder status at the first opportunity. 33 Advancement progeny outperformed all of their contemporaries to average 104 at weaning ratio.

E425 was the high selling bull in our 2017 sale to Alan Shufelberger. He is an extremely moderate Tahoe son that has natural muscle shape but remains calving ease. E425 was mated to some of our larger, higher birth females.

TEHAMA HERD Sires

While we use outside A.I. sires to introduce new genetics into our cowherd, we also are one of the few seedstock providers to test our own bulls against the industry. **By doing so, we know their mother from head to toe, their docility, and their individual performance profile.** This has resulted in greater success than combing through the bull books in search of positive results. Furthermore, we are able to reintroduce elite maternal genetics back into our herd.

Chaps is a Resource son that we used to moderate birth weight, but keep that same dimension and muscling found in Resource progeny. They are easy fleshing cattle that have added eye appeal.

COMMITMENT.

Raising quality registered Angus cattle takes commitment. As your genetic supplier, we take that seriously.

That's why we participate in MaternalPlus®. Through MaternalPlus, we devote extra time to tracking maternal traits beyond those normally required, ultimately targeting greater performance and predictability.

The data we choose to gather through this inventory-based program today sets the stage for reproductive and lifetime productivity tools tomorrow — tools to pioneer new ways of selecting the most profitable animals.

Herd improvement starts with smart decisions. A commitment to the female starts with MaternalPlus.

Contact AGI at 816-383-5100 or agi@angus.org for more information.

ANGUS MEANS BUSINESS.

ANGUS
THE BUSINESS BREED
www.ANGUS.org

Lot A TWENTY 2018 FALL-BORN COMMERCIAL HEIFERS

Here's a unique opportunity to own 20 commercial heifer replacements from Tehama Angus Ranch's highly maternal herd. (The bottom 20% of the 2018 calf crop has been sold elsewhere.) This is a very consistent group of heifers sired the same as the fall bull offering. Heifers will be selling gate-cut in lots of five after the last bull is sold.

The first buyer will have the opportunity to take five or clear the ring and take them all. All heifers sell as commercial; however, registration papers can be purchased for an additional \$200 per head. Visit with Kevin, Bill or Bryce for details (530) 526-9404.

Really neat pedigree with performance from top to bottom. Four maternal generations remain in production and are due to calve this fall.

One of the last Sierra Cut's that we have to offer, but still one of the best. We have sold full brothers to him in the past as well as calving three full sisters to him last fall. Those three sibs averaged a 104 WR on their first calves.

G007 is a remarkable standout. He possesses a tremendous amount of natural muscle in a moderate-framed package. He is flat topped, travels extremely well, and carries a pedigree that has been proven.

What is a Pathfinder?

1. The Pathfinder Cow must produce her first calf within 30 days of the herd- average calving date.
2. The Pathfinder Cow must maintain a regular calving interval. The maximum calving interval is:
365 Days + (30 Days/Number of Calving Intervals)
3. The Pathfinder Cow must produce at least three calves with an average weaning weight ratio of 105 to qualify for the report.

Pathfinders are denoted by the # in front of their name in a pedigree. Tehama Angus had 30 active Pathfinders for 2019; the most in the western U.S.

A note about CED

There is a lot of confusion when it comes to the CED EPD. CED is expressed as a difference in the percentage of unassisted births. A higher value indicates greater calving ease in first-calf heifers.

Producers in search of a bull to be used on mature females should not use CED as a selection criteria. Continuous selection for low birth weights and extreme calving ease will result in loss of newborn calf vigor. Calves need to be born of adequate size to be able to stand, nurse, and perform.

American Angus Association® Selection Tools

Expected Progeny Difference (EPD), is the prediction of how future progeny of each animal are expected to perform relative to the progeny of other animals listed in the database. EPDs are expressed in units of measure for the trait, plus or minus. Interim EPDs may appear on young animals when their performance has yet to be incorporated into the American Angus Association National Cattle Evaluation (NCE) procedures. This EPD will be preceded by an "I", and may or may not include the animal's own performance record for a particular trait, depending on its availability, appropriate contemporary grouping, or data edits needed for NCE.

Accuracy (ACC), is the reliability that can be placed on the EPD. An accuracy of close to 1.0 indicates higher reliability. Accuracy is impacted by the number of progeny and ancestral records included in the analysis.

GROWTH

Calving Ease Direct (CED), is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf heifers. It predicts the average difference in ease with which a sire's calves will be born when he is bred to first-calf heifers.

Birth Weight EPD (BW), expressed in pounds, is a predictor of a sire's ability to transmit birth weight to his progeny compared to that of other sires.

Weaning Weight EPD (WW), expressed in pounds, is a predictor of a sire's ability to transmit weaning growth to his progeny compared to that of other sires.

Residual Average Daily Gain (RADG), feed efficiency expressed in pounds per day, is a predictor of a sire's genetic ability for postweaning gain in future progeny compared to that of other sires, given a constant amount of feed consumed.

Yearling Weight EPD (YW), expressed in pounds, is a predictor of a sire's ability to transmit yearling growth to his progeny compared to that of other sires.

Yearling Height EPD (YH), is a predictor of a sire's ability to transmit yearling height, expressed in inches, compared to the that of other sires.

Scrotal Circumference EPD (SC), expressed in centimeters, is a predictor of the difference in transmitting ability for scrotal size compared to that of other sires.

Docility (DOC), is expressed as a difference in yearling cattle temperament, with a higher value indicating more favorable docility. It predicts the average difference of progeny from a sire in comparison with another sire's calves.

MATERNAL

Heifer Pregnancy (HP), is a selection tool to increase the probability or chance of a sire's daughters becoming pregnant as first-calf heifers during a normal breeding season. A higher EPD is the more favorable direction, and the EPD is reported in percentage units.

Calving Ease Maternal (CEM), is expressed as a difference in percentage of unassisted births with a higher value indicating greater calving ease in first-calf daughters. It predicts the average ease with which a sire's daughters will calve as first-calf heifers when compared to daughters of other sires.

Maternal Milk EPD (Milk), is a predictor of a sire's genetic merit for milk and mothering ability as expressed in his daughters compared to daughters of other sires. In other words, it is that part of a calf's weaning weight attributed to milk and mothering ability.

Mature Weight EPD (MW), expressed in pounds, is a predictor of the difference in mature weight of daughters of a sire compared to the daughters of other sires.

Mature Height EPD (MH), expressed in inches, is a predictor of the difference in mature height of a sire's daughters compared to daughters of other sires.

Cow Energy Value (\$EN), expressed in dollars savings per cow per year, assesses differences in cow energy requirements as an expected dollar savings difference in daughters of sires. A larger value is more favorable when comparing two animals (more dollars saved on feed energy expenses). Components for computing the cow \$EN savings difference include lactation energy requirements and energy costs associated with differences in mature cow size.

CARCASS

The genetic evaluation produces a single set of EPDs for carcass weight, marbling score, Ribeye area and fat thickness. The units of measure are in carcass trait format and analyzed on an age-constant basis.

Carcass Weight EPD (CW), expressed in pounds is a predictor of the differences in hot carcass weight of a sire's progeny compared to progeny of other sires.

Marbling EPD (Marb), expressed as a fraction of the difference in USDA marbling score of a sire's progeny compared to progeny of other sires.

Ribeye Area EPD (RE), expressed in square inches, is a predictor of the difference in ribeye area of a sire's progeny compared to progeny of other sires.

Fat Thickness EPD (Fat), expressed in inches, is a predictor of the differences in external fat thickness at the 12th rib (as measured between the 12th and 13th ribs) of a sire's progeny compared to progeny of other sires.

\$VALUE INDEXES

\$Value indexes, are multi-trait selection indexes to assist beef producers by adding simplicity to genetic selection decisions. \$Values are reported in dollars per head, where a higher value is more favorable. The \$Value is an estimate of how future progeny of each sire are expected to perform, on average, compared to progeny of other sires in the database if the sires were randomly mated to cows and if calves were exposed to the same environment.

Weaned Calf Value (\$W), an index value expressed in dollars per head, is the expected average difference in future progeny performance for pre-weaning merit. \$W includes both revenue and cost adjustments associated with differences in birth weight, weaning direct growth, maternal milk, and mature cow size.

Feedlot Value (\$F), an index value expressed in dollars per head, is the expected average difference in future progeny performance for postweaning merit compared to progeny of other sires.

Grid Value (\$G), an index value expressed in dollars per head, is the expected average difference in future progeny performance for carcass grid merit compared to progeny of other sires.

Quality Grade (\$QG) represents the quality grade segment of the economic advantage found in \$G. \$QG is intended for the specialized user wanting to place more emphasis on improving quality grade. The carcass marbling (Marb) EPD, which is influenced by carcass marbling scores and ultrasound percent intramuscular fat (% IMF) measurements, contribute to \$QG.

Yield Grade (\$YG) \$YG represents the yield grade segment of the economic advantage found in \$G. \$YG is intended for the specialized user wanting to place more emphasis on red meat yield. It provides a multi-trait approach to encompass ribeye, fat thickness and weight into an economic value for red meat yield.

\$G combines both \$QG and \$YG, and may be the best carcass decision tool for focusing on quality and red meat yield simultaneously.

Beef Value (\$B), an index value expressed in dollars per head, is the expected average difference in future progeny performance for postweaning and carcass value compared to progeny of other sires.

COMMITMENT to Quality & Customer Success

It is indeed a pleasure to be working with the Borror family as they present their annual "Generations of Performance Bull Sale", that will be held Friday, September 13, 2019. This family owned program is backed by four generations who have all maintained a commitment to quality genetics that will work for their valued commercial customers. **The Tehama Angus Ranch program has always been focused on high quality genetics that will add value, with never forgetting the value of the high maternal Angus female.** When you invest in genetics from the Tehama Angus Ranch program you can buy with confidence that you are investing in genetics that will work for you from a program that is focused on your success by people that stand behind their genetics.

The quality of this year's offering is as uniform as it has ever been. A tremendous set of Spring yearling bulls will be selling that are big, stout, deep ribbed bulls, who are also super sound structured and will get the job done in any environment. The Fall yearling bulls are without question the best set of Fall bulls to ever sell from this reputation program. These bulls have all be developed in a manner that all cattlemen can appreciate. They are super sound on their feet and legs and are expressing their genetic merit to grow and perform. The sire line up in these bulls is exceptional and will be highlighted with a large number of sons by one of the most popular bulls in the Select Sires line up, Tehama Tahoe B767. There will also be a large number of sons sired by Tehama Advancement E766, Baldrige Command C036, SS Niagara Z29, Ellingson Chaps 4095, KM Broken Bow 002 and other sires. The most impressive aspect of this offering is that every single bull selling is backed by a female who represents multiple generations of Tehama Angus Ranch breeding. There will be several outcross bulls selling that excel to the top of the entire breed for combinations of calving ease, growth and carcass merit.

Regardless if you are a commercial cattlemen or a purebred breeder, there will be a large number of bulls selling that will fit multiple programs. All of the performance data is made available for you to utilize in your bull buying decisions and every single bull selling has complete genomic information calculated and figured into the EPD profiles listed in this catalog. At Tehama Angus Ranch information overload has always been the way that they do business, so that their customers have access to all of the data. For customers new and old, I invite you to visit with anyone of the Borror family at Tehama Angus Ranch to discuss the cow herd power behind all these bulls selling. You can buy with confidence that these genetics will work for you and add value to the beef cattle industry.

For over 76 years, Tehama Angus Ranch has been the source for high quality Angus cattle. This year's sale offering is one to pay close attention to as there will be something for everyone included. It is an honor to be associated with this great program and I pride myself in always studying the cow herd and the cow power behind these bulls. Please feel free to contact me at 918-510-3464 if you would like to discuss any of the bulls selling. We look forward to hearing from you or seeing you in Gerber, CA on Friday, September 13, 2019. - *Rance Long*

THURSDAY NIGHT CAB STEAK DINNER

You are invited to our ranch to preview bulls on Thursday afternoon and then join us for a social hour and supper. Social hour will start around 5:30 p.m. with a delicious steak dinner to follow.

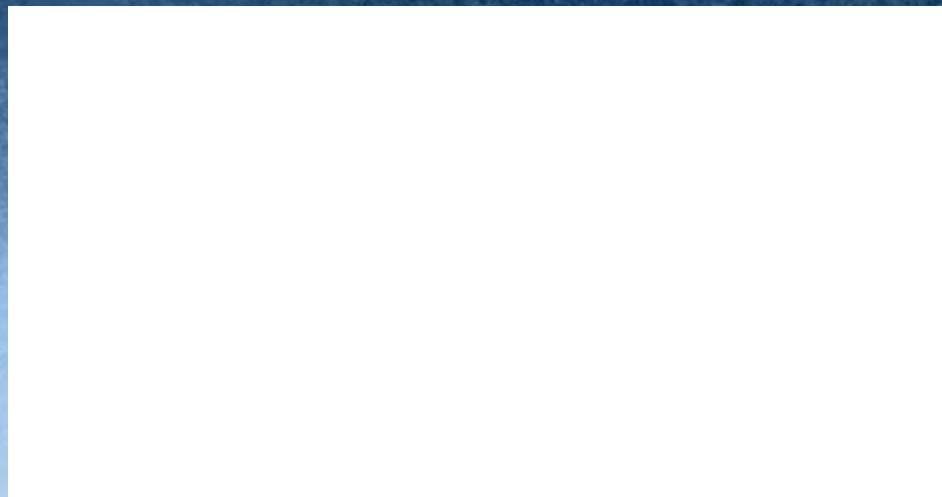

This is an excellent time to catch up, meet new friends and ask questions about our breeding program. *We look forward to seeing you there!*
