Stop in during the last week of October to receive Karen's **Homemade Halloween Treats.**

Winter Hours

Starting in November

Through February

We will be *Closed on Mondays*

All closings and hour changes will be posted at www.hohlsfarmsupply.net

Food Plot – Ask Karen: IDO WHITETAIL MINERAL – Economical Quality

One of our customer's, Ron, mentioned that he was impressed with the IDO Whitetail Mineral; specifically the low salt content with ample Calcium and Phosphorus being great for growing antlers. I know a lot about seeds and fertilizers, but this information, I did not know, so I wanted to pass it on to my Food Plot Readers. As always, I research reputable sources for the information I use in my newsletters. My findings were that Ron knows what he was talking about. Basically, Calcium and Phosphorus are the most important minerals for antler development. In fact, during development, the daily requirement for these two minerals can be 4 times higher than the required amount for regular maintenance. Additionally, Vitamin D is essential for the Calcium and Phosphorus metabolism. More important than antler development, minerals are necessary for the deer overall health, immune response and reproduction.

After talking to Ron, I recalled customer requests for the Deer Mineral, Maximizer, in the past. At that time, I looked into who was selling it, the cost and minimum order quantity. After none of those met my criteria to investigate the product

further, I just decided that our sales with our IDO Deer Mineral were good and people seem to love it. But now, I had a mission to see how the IDO Whitetail Mineral stacked up to one of the leading brand deer minerals that is sold in "Big Box" stores. In My opinion, the IDO Whitetail Mineral is a Superior product with a very economical price. The Maximizer retails a 20# bag between \$24 & \$28. Our prices for the IDO Whitetail Mineral are \$15/ 25# bag and \$25.50/50# bag. Don't take my word for it, see for yourself. Thank you, Ron for the opportunity to learn more about my products and inspiring me to ensure that we carry "Economical Quality."

WHITE TAIL MINERAL	
"Apple Flavored"	
A mineral vitamin supplement for deer	
All animals grow bigger and healthier when fed a nutritionally fortified diet. Deer are no different. When fed continuously, WHITE TAIL MINERAL provides the vitamins and minerals not always available out in the wild. The special apple flavoring will encourage deer to regularly consume the proper vitamins and minerals contained in WHITE TAIL MINERAL. Whether your interest involves hunting or viewing, take advantage of similar nutritional "miracles" livestock producers have used for decades. DOES benefit just as much as BUCKS by partaking of WHITE TAIL MINERAL.
