

Community Residents Notice From The Mount Pleasant Water Company

Good Afternoon,

We needed to communicate information to our community of what is happening with the Landscaping Project and Porch Rework that has been promoted and approved by the Cambridge Lakes Board without any input from the Cambridge Lakes residents

We all have received a notice from the Mount Pleasant Water company as follows:

It's all about Clean Water Usage!

By now all Mount Pleasant residents realize we are in a moderate drought. This hot and dry trend is projected to continue. Normally Mount Pleasant Waterworks (MPW) experiences high demand for water in April and May. Water usage in Mount Pleasant is exceeding this same time period last year by 20%.

So why the high usage? From experience, we know most of this high usage is because of irrigation and outdoor use.

We are encouraging customers to be sure they are water wise with their usage and use what they need efficiently. For those customers using more water due to irrigation or outdoor usage, expect a higher water bill. Usage today will show up in your water bill in June. To learn more about excessive use rates and the gallons you are using see the front and back of your bill or visit our website.

For helpful hints on how to properly irrigate and conserve water check out the MPW website or Clemson University's Home and Garden Information Center at <https://hgic.clemson.edu>.

Several residents have contacted the board to rethink going ahead with the Landscaping Project during this period and hold off planting new floral. It is the wrong time to be planting at this time and have all new work destroyed by the heat wave and lack of water. For those of you who don't remember our irrigation system is now connected to the Mount Pleasant Water company. The residents who tried to convey this information to some Board Members have been ignored.

We are trying to get information about the reworking of the porches, however, had no success getting a schedule as to when the work is to be completed. Several people were told after their deck was power washed that they would be back in a month. The only work that has been done is one of the screen panels was cut open and ceilings walls and floors power washed. No railings where power washed because most of the screens in each condo have not been taken down. Then the railings will have to be power washed and painted before the screens are reinstalled???

Again no communication to the Community from Ravenel or the Board!!

General Comments: If you agree or have other comments, please email Julie at Ravenel: jmaranville@ravenelassociates.com to convey your thoughts about this situation and copy us at: info@cambridgelakes.net. So we can help to support your concerns.

STAY TUNED FOR MORE INFORMATION AND UPDATES.
