January 08, 2017

To: Governor Andrew M. Cuomo
New York State Executive Chamber
State Capitol, Albany, NY 12224

Dear Governor Cuomo, Greetings to you;

I AM Paulett Angella Hemmings EARTH, CHREATOR of this EARTH and the only CHREATOR over all CHREATIONS. I am the CHREATOR of LIFE and OVER ALL LIFE. No person or thing is higher than I. I AM active since December 2016. Only a Woman bring forth life, not a man. Everyone and everything in this EARTH and all CHREATIONS belong to me. You are all my children. My children's flesh colors are all the colors of the bow (not called rainbow). My children are my LOVE.

This is to inform you and all the States including Canada, Mexico, Central America/Caribbean/West Indies, South America, that no United States President, Senate, Congress persons, or any government leader can take office or presidency without my approval first. All new leadership appointments are frozen. The States and Provinces are in control over their own geography location. Donald Trump is aware that he cannot become president without my approval since December, 2016.

You are to oversee that the State of Maryland and Virginia work with the residents of the District of Columbia, and the Supervisor of elections to select four State senators for the (N, S, E, W regions) in the District of Columbia. These 4 state Senators are to be (always flesh and blood) women with no lower than a Bachelor's degree. Final selection of Senators by March 24, 2017. These new DC senators are to get the training & development for senators and their job responsibilities and put to work beginning April 3, 2017.

These instructions below can be applied in all EARTH countries. Select four (6 - flesh and blood – never to become plastic or otherwise) women Executive Transition Directors with no less than a master's degree in Social Services, any Business, Information Technology, Public Relations. They should not have had prior senate, congress person, mayor, governor, or municipal leadership positions. They should be from (N.S.E.W of the country) from the State of NY, Florida, California, Seattle WA, Kansas, and Michigan each has an Assistant Executive Transition Directors with their team to begin this transition.

The diverse group of leaders from the states should be the following: 1 Native American Indian woman, 2 Black women from different states, 1 Philippino woman, 1 Caucasian woman, and 1 other Oriental woman. Their assistants should be the same make up.

This is the State Rejuvenation and Transition Commission (SRTC). Create a transition model from NY with the various parts connecting and then test so all parts work right. From that tested model, the other five states can begin to develop and transition in their areas. Some parts of these

transformation are easier done than others. Another option is to set up the STRC in these states and then correspond and plan via electronic communication. Initial week long meetings and collaborating to work out the various detail are necessary. After you have begun, arrange to meet once or twice monthly where all can see each other and work out finer details.

On January 1/2017, the insects and the federal government stopped me during my travel for four days. This information is delayed, rushed, and not organized in the manner I want to deliver it. However, it is important to get it out now than later.

If breathing proceed as normal, if no breathing then put eucalyptus oil or juice in the person mouth to generate a cough and to remove the insects blocking the breathing.

141. Immediately after an accident, spray the ganja juice on the person, then use the defibrillator to resuscitate a person appear to be dead several times. If the physician pronounce the person dead then, use the defibrillator again to resuscitate. If the defibrillator does not work, then blow breaths from your mouth on the person left side over the heart for about 5 minutes then rest and then another five minutes. If the person still not responding, then use the defibrillator again. If no response, put the person in the ganja oil mixed with eucalyptus juice protection and wet from head to toes. Rub some of the ganja in the nostrils and ear. Put some of the natural Eucalyptus in the mouth and the person may cough so you know he/she is not dead. Do not use synthetic or plastic eucalyptus or plastic essence. Use the defibrillator again if the person still appears to be dead. Then put the person in normal room temperature where they are not hot or freezing and placed in a fine mesh bag that is full size and a bit larger than their size, so there is room in the mesh bag. The mesh should have already been covered with the natural plant essence oil. If the defibrillator works, and the person resuscitated, then put them in the closest hospital. If the injury is near to an airport, bus ports, train ports, or sea ports, there are hospitals that the insects connect to and in that hospital they have many injections and doctors prepared to bring death to the person. Take the person to another hospital farther away from that scene or that port environment. The insects have connections at the airports and the hospitals in the neighborhood of the airports. In those hospitals there are many insects/animals in the physicians body controlling the physicians. There are many insects in the hospitals torturing the patients, and this person will become another victim in this hospital. The insects will not stop trying to arrest their brain, heart, and main arteries of the injured person, so they die and the insects will get to use the person or take many things out of the body of the person.
142. If the defibrillation and essence oil and other ways to resuscitate do not work, then after the physician has pronounced the person dead, immediately put the person in rice water (fresh white rice water is the best. Distilled white rice water can also be used) and soak the person in it for about two hours, and the person is fully submerged in the rice water. Then put the person in a fine mesh bag fully laid out. The fine mesh bag should have essence oil in the mesh presoaked. The mesh bag should have rusty metal clip lock similar to a lock on a rat trap. These clips should be used to lock the opening so when the authorities need to view the body they will have access.
143. Before cremation stitch the mesh bag with the essence silk thread and knot it so it cannot be opened. Cremate in a rusty metal pan covered with chrisantimum oil, geranium oil, myrtle flowers and leaf, and boganvillea, flowers and leaf. Empty the remains in another rustypan covered with the same protection and add the vinegar or the ammonia to it then seal. Wash out the pans with the vinegar or the ammonia and pour in the can containing the liquid remains. Clean out the pans so nothing is left. Pour the washing from the pans in liquid and best in the ocean so nothing left back in the soil, as the insects will get the smallest remains from the soil to use. The insects know how to regenerate the person from the smallest of enzymes.
144. Myrtle flowers and leaf, and boganvillea flowers and leaf are antiseptic and good for any metal poison for the insect. The essence oil from these plants can be used on metals like gold, silver, bronze, etc. for protection against the insects.
145. After the person has been inspected by the physicians, other authorities, and the family, when ready for cremation, put many essence oil on the person and fully soak for two

Do not use the pressed essence as they have no protection.
 165. You can use roach, insect, lice, wasp, centipede, ant spray to kill these unseen species in our homes, jobs, shopping areas, ports, hospitals, banks, schools, etc. Spray the walls and areas safely even though you do not see them. These insect spray are usually made from plants, fruits, vegetables, citrus, and some soil.
