16. Double-click to start program- because the program is accessing the database that resides on the main x-ray computer it will be slow. Please be patient, as double-clicking the icon more than once will cause the program to shut itself down.

17. You may be prompted to configure the databases before the software opens- to do so simply click the Next button until you reach the last page and then select Finish- once this is complete the software will open automatically. Please be patient.
