WwB... A GOOD PLANT RECOMMENDATION?

Aloe striata hybrid

'Ghost Aloe'

A low-growing Aloe, with masses of bright orange flowers? ... So you specify Aloe striata (the species). And that's what you get- a single head, that grows up and up on a short stem, and then FLOP! Yep, it falls over! Our Aloe striata HYBRID pups freely- nice clumps, with many times more flower stems coming from multiple heads. Prettier foliage, more flowers, no stem, and NO FLOP! From ocean's edge to mountain foothills. Hardy, tough. Sun or shade.

Stop the FLOP! Select Aloe striata HYBRID- Ghost Aloe
