Yast	This is a great time tracking tool. It is free for personal use.	Project Management
Uber Conference	UberConference gives you an easy, powerful, and pain-free way to schedule and run audio conferences, all without requiring annoying PINs. UberConference is FREE for unlimited calls with all main features. There are also business versions available for a minimal cost.	Project Management - Conference
Drop Box	Dropbox is a cloud storage provider (sometimes referred to as an online backup service) that is frequently used as a file-sharing service. You can load your eLearning here and share it with others.	Project Management - File Storage
Hightail	Hightail – formerly YouSendIt – is a cloud service that lets users send, receive, digitally sign and synchronize files. There is a limited free version as well as business versions that cost a bit more with more features/flexibility.	Project Management - File Transfer
We Transfer	WeTransfer is one of the simplest services to use for sharing large files. A few clicks of the mouse and the website will automatically send files for you, and these will be available to download for seven days. Everything is very user-friendly, too, with a step-by-step wizard to walk you through the upload process. It also has password protection for downloading files.	Project Management - File Transfer

Resource	Description	Type
Scorm Cloud	Having trouble with your eLearning on your company LMS? Get a free account and test it on this website to compare results.	Project Management - LMS Testing
Review My eLearning	This site helps you to share your elearning projects and provides a clear way for your project team to leave comments/feedback. This site provides a free trial for 30 days.	Project Management - Reviews
Tempshare	Say you're looking for a quick way to test your published Articulate Storyline projects, but you don't have access to a web server. Not to worry—just use Tempshare. Articulate engineers put together Tempshare over one weekend to help folks upload and test Articulate Storyline content. Note: Tempshare is not an official, supported Articulate product.	Project Management - Testing Published Files
VideoGrabby	Want to download a creative commons video online for your project? Try this resource, VideoGrab. A simple-to-use web app that helps you to download videos from the majority of the most popular video sites. Type the link and hit Go. Its that easy. Just make sure to check the licensing and copyright requirements for your video.	Video Downloading
The Plot	This is a free and fast storyboard creator (I found this tool works best when I'm storyboarding videos). You can add and delete scenes without copying and pasting text, incorporate images from anywhere on the web to visualize scenes faster, and collaborate with coworkers from within the software. Plot is a solid option if your team often works under tight deadlines and needs a software to create storyboards quickly.	Video Storyboarding
Boords	Boords is a cloud-based tool that can be used for storyboarding animated videos. With the free version you get 2 active storyboards.	Video Storyboarding

TechRadar	This article lists several free editing resources and their pros/cons.	Video Editing
SoThink	You can use SoThink to convert SWF to FLA, FLEX, and HTML5. You can also view and extract all SWF elements, decompile and export AS, and do simple edits on SWF shapes directly.	Video Editing/Playing
VLC Media Player	VLC is a free and open source cross-platform multimedia player and framework that plays most multimedia files as well as DVDs, Audio CDs, VCDs, and various streaming protocols.	Video Editing/Playing
Screentogif	This tool is a free Screen, webcam and sketchboard recorder with an integrated editor. Many people use this for gif creation.	Video - Video to Gif Creation

Resource	Description	Type
Loom	Did you find a bug on a course you want to show your team quickly? Or do you want to take a quick video on your browser of how to use an application or website? Check out this amazing and free chrome extension for recording your screen.	Video - Screen Recording From Your Browser
Active Presenter	Looking to build interactive vidoes? Check out this free tool. ActivePresenter includes all the tools needed to record screen, annotate, edit screencast videos and create interactive eLearning contents in HTML5.	Video/Screen Recording
CamStudio	CamStudio is a pretty straightforward program that lets you record your screen and audio and produce outputs in AVI or SWF format. It enables annotation such as text and call out inserts and even provides you some cursor options such as default, hidden or highlighted, which should be carefully laid out prior to recording. You have some video options too which lets you control compression, frame rates , quality and time lapse but aside from that, you can't really do much with the video because it doesn't include editing capabilities.	Video/Screen Recording
Screencast O-Matic	This is the trendiest screen recording tool currently on the market, particularly popular among tutorial content creators and demo producers. With over 30000 videos recorded every day, Screencast O-Matic also offers the option to embed your material with watermark. Moreover, users can access several free, in-depth tutorials regarding editing and scripted recordings. In order to make a video, simply click Start recording to begin and Stop recording when you're finished.	Video/Screen Recording
Webineria	Webineria is an open-source easy-to-use screencast tool which lets you capture your screen activity and do "picture-in-picture" video by adding your webcam stream. It provides you 3 frame rate options: 5, 10 and 15 frames per second and outputs can be produced in either AVI or FLV format. It has built in features too that let you adjust the boundaries of your record area, use hotkeys to pause and resume recording. Outputs are saved on the site and can be shared via email links or embedding on websites.	Video/Screen Recording
