

# THE SUMERIAN SOLAR SYSTEM

The purpose of this illustration is to depict the findings of Karel Donk who has scientifically and mathematically calculated the relative sizes of the famous VA-243 Sumerian scroll. It is entitled the *Granting of the Plow* showing the supposed Solar System of the 12 heavenly sphere with Planet x or Nemesis. According to some, Nemesis is the supposed 2nd binary sun that is a Red Giant Dwarf or failed sun. It has great density and due to its mass and absorption of light, can only really be detected in the infrared light spectrum. What is amazing about this scroll is that is no larger than an inch in diameter and to have such minute intricacies is astonishing. The depiction according to Donk's conclusions is that it is the most accurate rendering of the Solar System although Sitchin, whom made famous the scroll mislabeled some of the spheres. Also, there is a distinction of the Sun encompassed by a trouble tetrahedron as opposed to the motif of Nemesis that is always depicted as a 'cross' motif.

Figure 2

Ancient depiction of Nemesis, as the Winged Disc with horns. It is different from Nibiru. Nibiru is one of the 7 planets believed to orbit the 'Death Star', Nemesis or the Black Sun.

VA-243 Sumerian Scroll made famous by Zecharia Sitchin entitled the *Granting of the Plow* by the Anunnaki to their created humans on Earth.

## NEMESIS

2nd Sun – binary

Many believe that the Swastika derived from this 2nd Sun, deemed the Black Sun, the Death Star, etc., as its various flybys have had cataclysmic effects on Earth and the entire Solar System. Also of note, the position of Nemesis is accurately positioned in-between Jupiter and Mars.

The following are the names associated with Nemesis. There is a confusion and a misnomer as it should be thought as a star or sun in which a planet is famed to orbit it.

- Nibiru
- The 10th Planet
- The 12th Planet
- The 9th Planet
- The Black Sun
- The Destroyer
- The Death Star
- Planet of the Crossing
- The Red Dragon
- Vulcan
- Tyche
- Wormwood
- The Winged Disc
- Hercólibus

In January of 2016, NASA and Cal Tech publicly announced the 'discovery' of 'Planet 9'. This is a disinformation effort to get ahead of the coming flyby and put a spin on the real existence of Planet X.

The depiction of the Solar System, if accurate reveals that the Sumerians knew of the entire Solar System planetary bodies and not just the 5 to 7 that is conjectured that they only knew of. Donk who is from Suriname has a blog that posted his findings at <https://blog.kareldonk.com>. He is a brilliant mathematician, computer scientist and statistician the formulated the relative size of the scroll spheres through the pixilation of the image and used mathematical logarithms to ascertain a comparison of the actually Solar System size of the planets; they match.

Reality			Based on Fig2		
Body	Diameter (KM)	Log10 (S1)	Body	Diameter (pixels)	Log10 (S3)
Pluto	2,306	3.362859303	1	28	1.447158031
Moon	3,473	3.540704783	11	30	1.477121255
Mercury	4,880	3.688419822	2	35	1.544068044
Mars	6,794	3.832125543	7	37	1.568201724
Venus	12,104	4.082928915	3	41	1.612783857
Earth	12,756	4.105714511	10	44	1.643452676
Neptune	49,532	4.694885864	8	53	1.72427587
Uranus	51,118	4.708573854	9	55	1.740362689
Saturn	120,536	5.081116775	4	64	1.806179974
Jupiter	142,984	5.155287442	5	66	1.819543936
Planet X (Nibiru)	226,973	5.355974198	6	76	1.880813592
Sun	1,392,684	6.143852586	12	125	2.096910013

Apparently at the time of the making of the scroll, the Sumerians believed that Pluto was a Planet. They actually started counting the heavenly bodies from the outer edge of the Solar System. Although other planets have moons, only the moon of the Earth is counted, thus there is a total of 12 heavenly objects constituting the Solar System, which as binary one.
