A Complete line . . .

**FOR THE BEGINNER
FOR THE BOWHUNTER
FOR THE TOURNAMENT ARCHER**

By the nation's oldest manufacturer
of quality archery equipment

**the ultimate in beauty
and performance!**

Constellation

A classic combination of symmetrical beauty and functional design, the Constellation belongs to the archer who places a high value on perfect balance—in addition to maximum stability, cast and smooth shooting. This is the tournament bow with a feel that builds confidence.

The Constellation's oversize handle section, entirely of beautiful Brazilian Rosewood, adds extra weight to provide the utmost in smooth shooting. And the careful balance between deflex for stability and reflex for cast gives this bow the inherent characteristics necessary for consistent accuracy and flat trajectory.

All of these features have added importance and value because the individual archer can balance the Constellation exactly to suit his particular style and to compensate for the brace height which produces his best results. The forward-placed projections have capped ports for insertion of from 1 to 8 lead discs, so the precise combination of weights can be used to realize perfect balance.

Finally, the Constellation is made of the finest glass backing and facing, the most select woods and is finished in a satin gloss obtained through hand buffing. It is available for both right and left handed archers.

Cat. No. TBW-1 Length 68 in.....\$129.50
Pulling weights to 50 lbs. For arrows to 32 in.
Weighed at 28 in. draw
Recommended brace height: Approx. 8 in.

Pulling weights to 50 lbs. For arrows to 30 in.
Weighed at 28 in. draw
Recommended brace height: Approx. 7½ in.

Imperial

The YORK Imperial for 1967 is a tournament bow of unusual beauty that will measure up to the high standards of the most critical archer.

In designing and building the Imperial, YORK engineering and know-how has developed a bow with the highest degree of stability consistent with maximum limb efficiency. The oversize, all Brazilian Rosewood handle section adds that extra weight for silky smoothness. And, through precise design, the forward projections have been placed so as to provide exceptional built-in balance. This is truly a bow that will deliver.

IMPERIAL BOW FEATURES

The Imperial is made of the finest glass backing and facing, the most select woods, and is finished in a satin gloss obtained through hand buffing. It is available for both right and left handed archers.

Cat. No. SWR-1 Length 68 in. . . \$89.50

Coronet

Only YORK could develop a bow with so much going for it. Over 40 years of bowmaking experience are behind the crisp, modern lines and limb design of the Coronet. Its beauty is unique among fine bows. You will quickly appreciate the way it draws and the real thrill comes when you release. You'll watch the arrow hit the target and scarcely know it has left your bow. Never before have you seen a tournament caliber bow like the Coronet in this price range.

CORONET BOW FEATURES

The Coronet is a full working recurved composite bow made with the finest fiber glass facing and backing and the most select woods. Center shot vertically and horizontally with full length sight window. The handle section is of exotic imported hardwoods beautifully finished and hand buffed. Available for right and left handed archers.

Super Crest

Crest

Crescent

Cadet

For real shooting satisfaction!

Super Crest

The Super Crest combines outstanding features of design with striking and harmonious laminations of White Holly and exotic imported hardwoods to provide a remarkable bow of exceptional value. With longer limbs, extra weight in the handle section and the forward placed balance projections, it has particular appeal for the target and field archer. The Super Crest has shooting qualities, beauty and value that make it a real "winner."

SUPER CREST BOW FEATURES

A modified recurved, reflexed composite bow with wood core, backed and faced with finest fiber glass. Center shot, vertically and horizontally with full length sight window. Available for both right and left handed archers.

Cat. No. WRZ Length 66 in.....\$50.00
 Pulling weights to 55 lbs. For arrows to 30 in.
 Weighed at 28 in. draw
 Recommended brace height: Approx. 7½ in.

Crescent

Here's a value-packed, budget-priced composite bow that is rugged and dependable, and gives real shooting satisfaction, too. The Crescent is an excellent first bow for the adult beginner or the new bowhunter. A reflexed, modified recurve with smoothness, accuracy, and graceful beauty far beyond its modest price. Available in right and left handed models.

CRESCENT BOW FEATURES

Modified recurved, reflexed, fiber glass backed and faced. Medium length sight window, saddle-type contoured handle. Double looped Dacron bowstring, served at ends and at nocking point. Satin smooth finish.

Cat. No. GBF-1 Length 64 in.....\$30.00
 Pulling weights to 55 lbs. For arrows to 28 in.
 Weighed at 28 in. draw
 Recommended brace height: Approx. 7 in.

Crest

The Crest is a beautifully designed, moderately priced bow with a real feel for hunting, field or target shooting. Combining YORK custom quality with exotic imported hardwoods provides beauty as well as cast and consistently dependable performance. The Crest has rugged stamina and the fine shooting qualities demanded by the experienced archer.

CREST BOW FEATURES

A modified recurved, reflexed composite bow with wood core, backed and faced with finest fiber glass. Center shot, vertically and horizontally with full length sight window. Available for both right and left handed archers.

Cat. No. RRS-1 Length 64 in.....\$40.00
 Pulling weights to 55 lbs. For arrows to 30 in.
 Weighed at 28 in. draw
 Recommended brace height: Approx. 7½ in.

Cadet

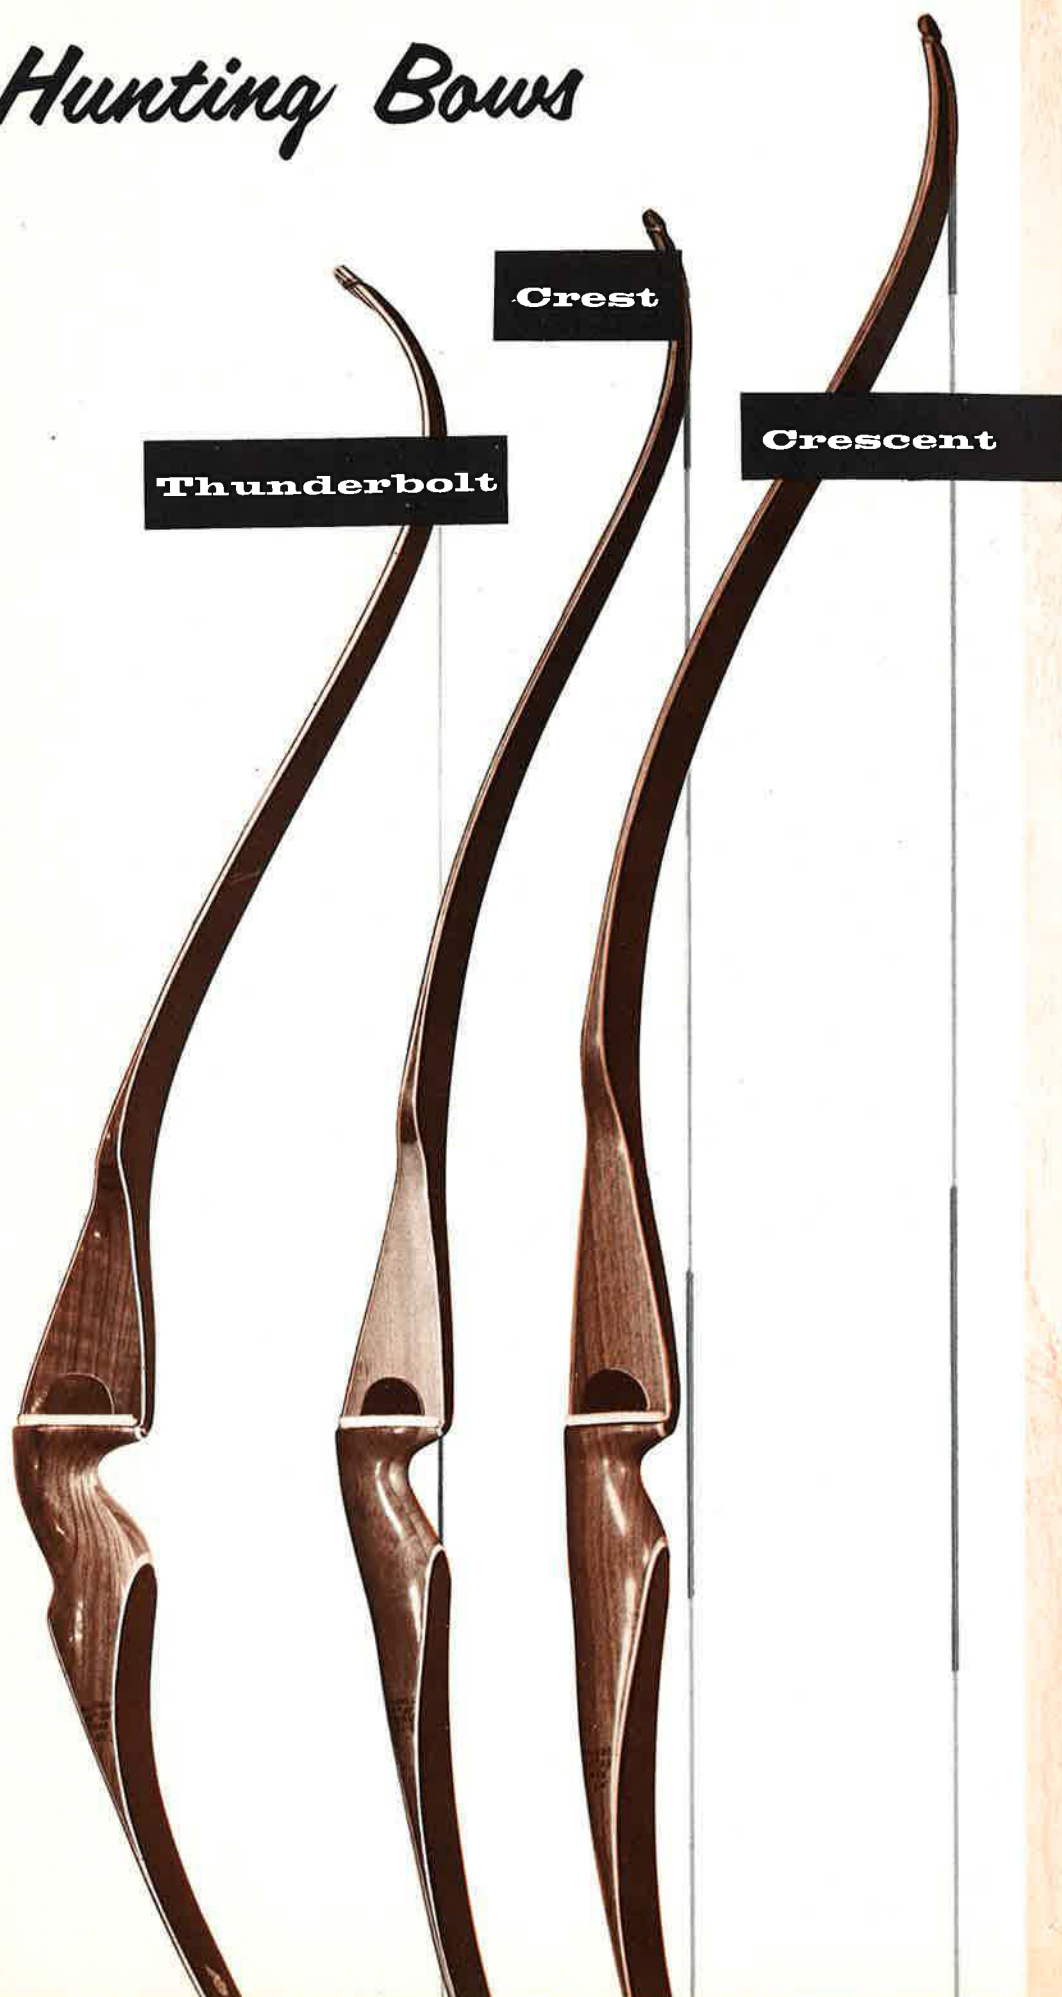

A quality composite bow at a remarkably low price. With the Cadet, you have a handsome, hardhitting bow that is light in the hand and a pleasure to shoot. It's perfect for beginners.

CADET BOW FEATURES

Modified recurved, reflexed composite, backed and faced with fiber glass. Sight window and contoured handle. Double looped Dacron bowstring, served at ends and at nocking point. Available in right and left handed models.

Cat. No. BFB Length 60 in.....\$22.50
 Pulling weights to 40 lbs. For arrows to 28 in.
 Weighed at 28 in. draw
 Recommended brace height: Approx. 6½ in.

Hunting Bows

**matchless beauty
teamed with
superb
performance!**

Thunderbolt

This short, smooth shooting, hard-hitting bow has become known the country over as the favorite weapon among bowhunters. Designed and built to provide exceptional limb efficiency as well as dependability, the Thunderbolt has a handle section of rich American Walnut that is carefully contoured for a natural, comfortable feel. This is the most impressive hunting bow you'll ever handle.

THUNDERBOLT BOW FEATURES

The Thunderbolt is a full working recurved composite bow, made of finest glass backing and facing and the most select woods. It is finished in a satin gloss obtained through hand buffing. Extreme stability is provided by forward placement of the deflexed, saddle-type handle. Available for both right hand and left handed archers.

Cat. No. RRH Length 54 in. . . \$55.00
Pulling weights to 70 lbs. For arrows to 30 in.
Weighed at 28 in. draw.
Recommended brace height: Approx. 7½ in.

Crest

The 60" Crest is a versatile, power-packed bow that offers exceptional shooting qualities and dependability at a very moderate price. This bow has proven itself under every field condition imaginable and is already a favorite among archers who know a really good buy.

YORK custom quality and design are combined with exotic imported hardwoods and the finest fiber glass facing and backing. Center shot vertically and horizontally with quiet, hunting arrow rest. Available for both right and left handed archers.

Cat. No. RRS-2 Length 60 in. . \$40.00
Pulling weights to 55 lbs. For arrows to 28 in.
Weighed at 28 in. draw.
Recommended brace height: Approx. 7 in.

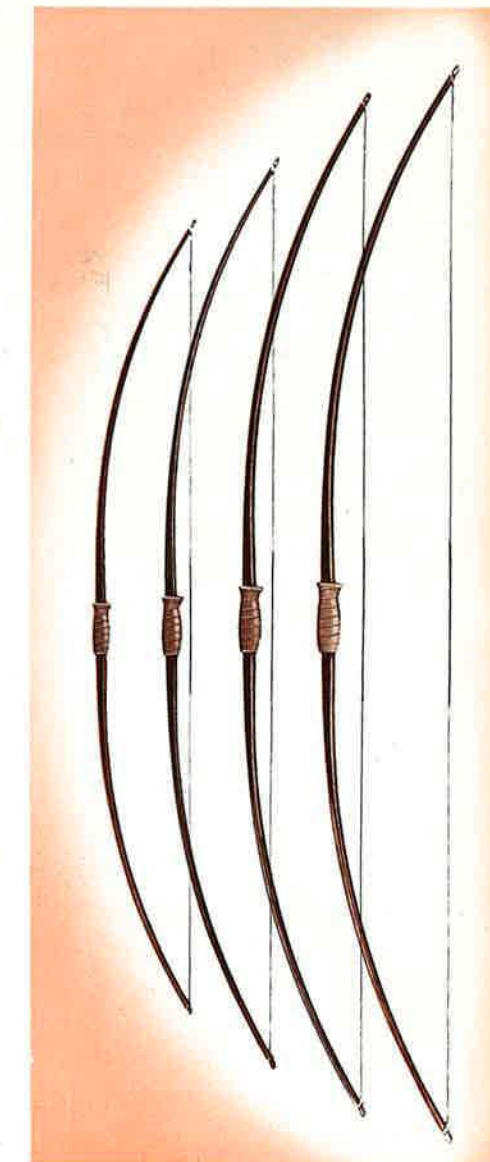

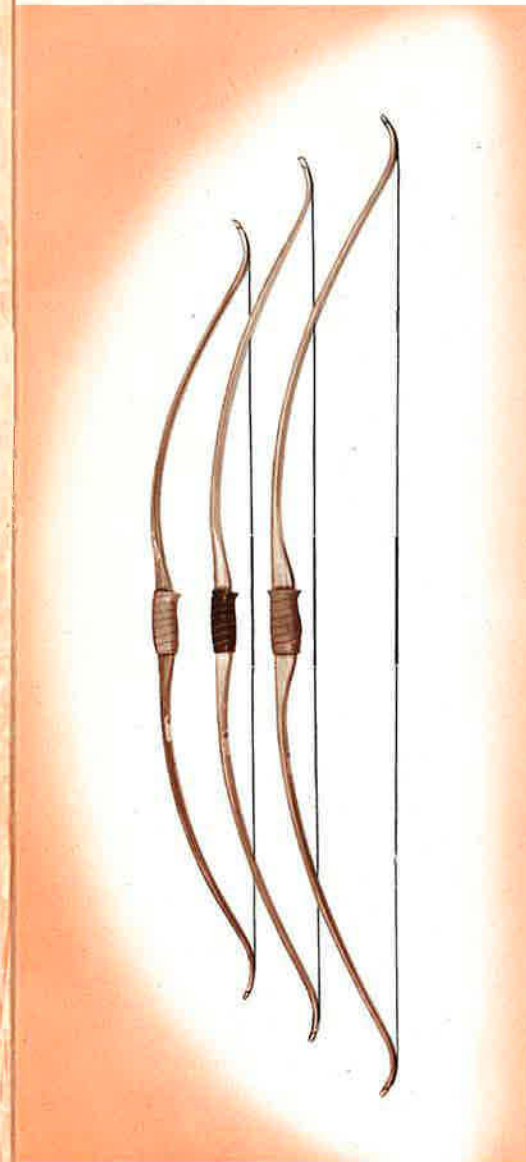

Crescent

The short Crescent is a bow that will put you in the field with satisfying shooting power and great dependability at a budget price. This is a bow that will surprise you with its smooth draw, exceptional cast, and a minimum of shooting vibration.

Modified recurved, reflexed, with American Walnut handle section. Medium length sight window, saddle type contoured handle. Available for right or left handed archers.

Cat. No. GBF-2 Length 60 in. . . \$32.50
Pulling weights to 55 lbs. For arrows to 28 in.
Weighed at 28 in. draw.
Recommended brace height: Approx. 7 in.

Quality Craftsmanship in Fiber Glass

A complete selection of lengths and styles make YORK's fiber glass bow line a perfect choice for beginning archers, school archery programs and budget minded bowhunters. Guaranteed unbreakable, these bows have molded saddle-type handles and offer dependability and value beyond compare.

SATELLITE SERIES

Perfect choice for beginning archers, school Archery classes! Bows in YORK's Satellite Series are made of tough, durable fiber glass with recurved ends, flat contoured limbs, molded saddle-type handles and built-in arrow rests. Each streamlined beauty is built to precision for perfection in detail, finished in rich, glowing colors. Weather conditions will not affect the performance nor mar the beauty of these hard-shooting bows. Dollar for dollar, feature for feature, you won't find a better bow anywhere!

A firmly riveted and sewn quiver of strap leather and elk-grained cowhide for fitting onto the belt and inserting into the hip pocket. Preferred by men for target Archery because of minimum encumbrance. . . . ea. \$2.00

AQ-17

No. AQ-17 Serviceable target quiver of brown Walrus grain Ser V Lon for carrying twelve arrows. Formed stiff leather bottom and loop for attaching to wearer's belt. Length 17 inches, top opening 2½ inches. ea. \$1.25

Accessories by YORK

Deluxe Bow Case. Made of brown mahogany, leather grained vinyl, heavily padded with foam backing. Soft tan flannel lining. Extra long, heavy duty zipper with locking ring and web zipper guard. For recurved bows up to 5'8" in length. Cat. No. PBC. ea. \$ 9.95

No. AG-23 — An exclusive Archer's glove, by York. Designed after most careful study. Features the York closed finger ends in improved form. Tooled calfskin back and genuine aniline dyed Cordovan finger ends. Adjustable wrist strap. Sizes: extra large, large, medium, medium small, and small. State Size. ea. \$2.50

AG-23

No. AG-26 — Same fine Archer's glove as shown above, except this model features an elastic back. Sizes: extra large, large, medium, medium small, and small. State Size. ea. \$2.95

AG-26

No. AG-24 — Archer's Glove. Back is of garment cowhide, with heavy cowhide fingertips. Adjustable wrist strap. Sizes: extra large, large, medium, medium small, small. State Size. ea. \$1.50

AG-24

No. AG-22 — Die-cut shooting tabs of elk-grained cowhide. Large or small sizes. ea. \$.25

No. AG-21 — Die-cut shooting tabs of genuine Cordovan leather. Large or small sizes. . ea. \$.50

No. AG-19 — Die Cut Shooting Tab. Made of genuine Cordovan with smooth leather lining. Comfortably fits middle finger. Small, medium and large size. ea. \$.75

Cat. No. AG-30 — Hook and Lace Type Arm Guard — Made of firm strap leather completely lined with thin felt. Designed with new offset front which permits greater comfort and free movement of the wrist. Held in place by hooks and lace. ea. \$1.50

Cat. No. HG-40 — Hunting Arm Guard — Made of top grain cowhide lined with thin suede sheepskin. Held in place by three straps and buckles. Two steel center stays for ample wrist protection. ea. \$2.95

Cat. No. AG-10 — Skeleton Type Elastic Strap Arm Guard — Made of lightweight strap leather, lined with thin suede sheepskin. Spring steel center stay for adequate wrist protection. Held in place by two elastic straps. ea. \$1.95

Cat. No. AG-15 — Elastic Strap, Single Hook Arm Guard — Made of natural strap leather, lined with imitation leather. Steel center stay for added wrist protection. ea. \$1.00

Bow Fishing Equipment

When you go after the big ones with a fish arrow, you'll need a rugged, dependable fiber glass bow that will stay with you. The RG-50 shown above will meet your requirements in every respect.

CAT. NO. GFA SPECIAL BOWFISHING ARROW. Shaft is solid fiber glass, 5/16" in diameter. Special fishing point has double barbed, tempered tip which is removable for easy extraction of arrow from fish. Waterproof, rubber, 3-vane fletching. Brilliantly crested. Drilled holes provided for line at point and at nock. Lengths 28", 30"* ea. \$3.00

CAT. NO. GFA-2 SPECIAL BOWFISHING ARROW. Same as No. GFA except point is not tempered, does not have removable barbed tip. Lengths 28", 30"* ea. \$2.50
*Individuals customarily use fish arrows up to 2 inches longer than their properly fitted target or field arrows.

DFP-35 Special Fishing Point. Double barbed, tempered point which is detachable for easy extraction of arrow from fish. 5/16 inch diameter, parallel bore. ea. \$1.25

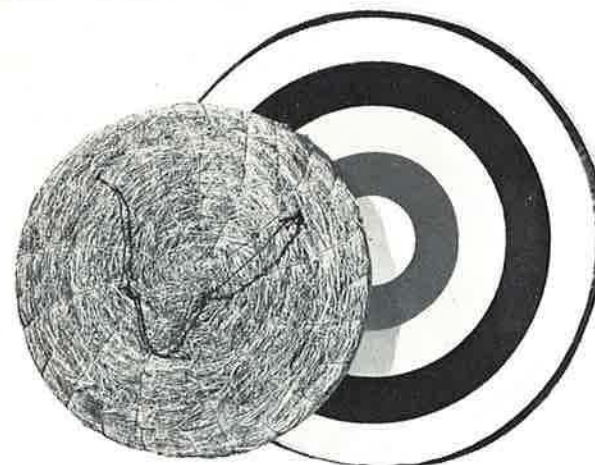

FP-35 Solid Double Barbed Fishing Point. 5/16 inch parallel bore. ea. \$.75

M-55 Fishing Reel. Made of aluminum with flange mounting bracket. Easily taped to bow and it offers snag proof uncoiling. Complet with 60 feet of 72 lb. test line. ea. \$3.50

Targets and Target Stands

Tournament approved, machine made, hand tied targets of long length Indian Cord grass. Chemically treated for longer life, greater stopping power and resistance to vermin. ea. \$31.95
No. MG-48—48 in.—70 lbs. ea. \$18.50
No. MG-36—36 in.—40 lbs. ea. \$10.75
No. MG-24—24 in.—20 lbs. ea. \$10.75

IMPORTANT NOTICE:

MG targets are shipped direct from the factory in Columbus, Nebraska and are considered separate from all other YORK items on freight allowances. Prices provide for full prepayment of freight on target shipments weighing 200 pounds or more. On target orders that weigh 100 to 200 pounds the freight charges will be added to the invoice, with an allowance up to \$4.50 per hundred pounds then being deducted. Target orders weighing less than 100 pounds must be shipped collect without any allowance being given.

Cat. No. CT-16
Cat. No. CT-16F

LOW PRICED CORRUGATED BOX TARGETS

Cat. No. CT-16 Handy-Target for beginners. To be set-up into 18 inch square by 4 inch thick box, stuffed with wadded papers (rags are better) and taped closed. Standard 5 color 16 inch face on main panel. Sold only in multiples of six. ea. \$1.25

Cat. No. CT-16F As above, but set-up and filled with tightly rolled corrugated filler. Sold only in multiples of two. ea. \$2.95

TARGET STANDS

Made of soft wood so as not to damage arrows. Brackets on outside legs on which to place targets.

Cat. No. T-60—6 ft. for 48 in. targets. ea. \$6.50

Cat. No. T-50—5 ft. for 36 inch or 24 inch targets. ea. \$6.25

Cat. No. T-60

Cat. No. T-50

Bowstrings

CAT. NO. DS BEST QUALITY DOUBLE LOOP BOWSTRINGS. Made of Dacron "B" with each strand pre-stretched and pre-waxed. Served at the loops and at the center. Specify bow length and bow weight in ordering. Available for these bow lengths:

Bow Length		Bow Length	
No. DS-59 for 5'9" bow		No. DS-52 for 5'2" bow	
No. DS-58 for 5'8" bow		No. DS-50 for 5' bow	
No. DS-56 for 5'6" bow		No. DS-48 for 4'8" bow	
No. DS-54 for 5'4" bow		No. DS-46 for 4'6" bow	
No. DS-53 for 5'3" bow			

.....ea. **\$1.25**
CAT. NO. RS BEST QUALITY SINGLE LOOP DACRON BOWSTRINGS. Served at the arrow nocking area. When the nock-to-nock bow length cannot be accurately determined, it is sometimes better to order single loop strings because the one plain end permits adjustment.
 Available in four lengths:

Cat. No. RS-48 for bows 4'8" to 5'	
Cat. No. RS-52 for bows 5' to 5'4"	
Cat. No. RS-56 for bows 5'4" to 5'8"	
Cat. No. RS-60 for bows 5'8" to 6'ea. \$1.00

CAT. NO. DBS DOUBLE LOOPED BRAIDED DACRON BOWSTRINGS. Available in two lengths for bows not exceeding 35 lb.

Cat. No. DBS-40 for 4' bows	
Cat. No. DBS-46 for 4'6" bowsea. \$.60

CAT. NO. FS-60 LOW-PRICED HEMP BOWSTRINGS. Braided, single loop. One size, for bows to 6 feet in length.ea. **\$.40**

Target Faces

DRAWSTRING TARGET FACES

Drawstring faces which can be applied to the target in ten minutes—no tools required. Made of dull oilcloth with heavy cloth drawstring bands. Non-glaring, standard colors; in most appropriate shades.

A Guide for Selecting Proper Equipment

ARROWS

If the beginner in Archery is to experience the progress which makes for lasting interest and maximum enjoyment of the Sport, he must begin with properly fitted equipment. Skilled and accurate shooting is dependent upon the consistency with which each successive arrow is shot. Consistency is dependent upon the degree of accuracy with which arrows are matched in weight and spine (stiffness) and upon the accuracy with which arrows are fletched (feathered). For consistent shooting it is also very essential that the pounds of force or thrust behind each arrow be exactly the same. The "pounds of pull" of a bow is an expression of the pulling force required to draw that bow (pull the bowstring back) to a fixed distance. If the thrust behind each arrow is to be consistent, it will be readily understood that the distance the bow is drawn must be the same for each shot. In Archery the arrow is the gauge which regulates this pulling distance.

To correctly measure the arrow length most suitable for you, place the nock of an arrow in the center of your chest about six inches below the chin. Hold the point end between the palms of your hands. With the arms extended to their full reach, straight in front of you, the point of the arrow should extend to the tips of your fingers. (See Fig. 1). This is the proper method of equipping the archer with target arrows.

For selecting proper length arrows of other types refer to Fig. 2. Select each type of arrow so that the tips of the fingers extend to that point on the arrows indicated by the dotted line.

By all means be sure that you shoot the correct length arrows because the development of real skill depends on this factor and, in addition, unnecessary length adds weight that robs you of velocity.

Fig. 1
Determining Arrow Length

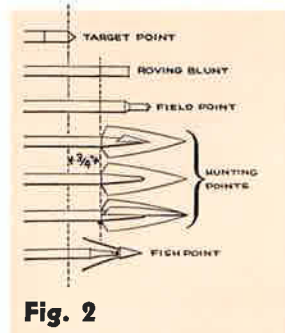

Fig. 2
Arrow Length Is Measured from Bottom of Neck to Point Indicated by Dotted Line.

Now—whether you anchor under your chin (generally preferred by target archers using bowsights) or with the first finger at the corner of your mouth (for instinctive shooting and hunting)—you have a gauge to regulate your pulling distance. When shooting target arrows you will know that you have reached full draw for each shot when the point is flush with the back of the bow (the bow surface farthest from the eye). Hunting and field arrows will extend from the back of the bow but, when you have the proper length, a part of the instinctive skill quickly developed will enable you to easily gauge the full draw point.

BOWS

In choosing any bow do not make the mistake of becoming "over-bowed". Choose one that you can pull to full draw and hold without shaking or straining too much and you will be able to develop proper shooting habits and progress more rapidly than if your bow is too heavy for you. A little tremor or shaking is all right; the muscles used for drawing a bow will develop quite rapidly with routine practice. But, in shooting, it is best to lay the bow down for a while if it becomes difficult to draw and hold for precise aim. It is easy to develop bad shooting habits and you always want to avoid "snap" shooting.

For many beginners, school archery programs and for budget minded bowhunters the YORK line of solid fiber glass bows offers a complete selection of styles and lengths. Review the specifications on these and note that the various models are available at different maximum pulling weights and that each is "weighed" at a certain draw distance. Choose from these, keeping in mind that each is designed for specific applications. Thus, the very young boy or girl will want a 4 ft. bow while the high school or college age beginner will prefer the SG-50 or SG-54 in the 20 to 30 pound range. The bowhunter will want a 45 to 55 pound bow.

To obtain the maximum enjoyment and pleasure from the Sport of Archery choose a YORK composite bow. Laminated of the finest fiber glass and woods the nature of their design and construction is such that these bows provide the highest degree of limb efficiency and shooting smoothness.

Generally speaking, bows 64 inches or longer are best for any phase of the sport involving continuous shooting. However, those archers who shoot 26 inch arrows or less will want to give serious consideration to bows 64 inches or shorter to take full advantage of the limb efficiency built into their bow. The bowhunter will place a high value on the shorter bows for maximum cast and easier handling in the brush.

Your composite bow is precision built and deserves fine care. When not in use keep it unstrung and hung vertically or on a bow rack with pegs supporting both limbs. Apply a coat of good furniture wax occasionally to protect the finish. Be very careful while bracing (stringing) your bow to avoid twisting the limbs.

Recommended brace heights are given for each bow as an approximation in the catalog specifications. This distance is measured from the bowstring to the deepest cut in the handle, sometimes called the pivot point. See Fig. 3. Proper brace height for each model will vary with different archers and shooting styles and should be adjusted, by twisting the bowstring, to obtain maximum freedom from string noise, wrist slap and erratic arrow flight. Your bow will shoot noticeably smoother when braced to the correct height.
