Adobe solutions for training and eLearning for government

Real-time and just-in-time solutions for government agencies extend training to people virtually anywhere

The learning and performance support needs of an increasingly diverse workforce have never been greater. Whether it's training new employees, helping workers learn new applications, or providing situational training to help warfighters and first responders deal with issues immediately, there is a very real need for instant, cost-effective training.

In an effort to become more efficient and effective with fewer resources, governments are actively seeking ways to recruit and retain key personnel. They need training and recruitment programs to help fill positions and to provide government contractors with the workforce necessary to meet service demands and technology proficiency requirements.

Unfortunately, traditional classroom training is becoming cost-prohibitive, and many alternatives, such as CDs and training manuals, are not always available to all people, anywhere in the world. While eLearning is gaining popularity, many of these solutions require agencies to install unwieldy software. Not only does this increase cost, even for employees in an office setting, but it also makes it virtually impossible to extend training to mobile workers and warfighters in less predictable circumstances. Adobe solutions for training and eLearning arm people virtually anywhere, using many different devices, with information to make the right decisions.

### Rapidly create and deliver high-impact online training

Adobe® Connect™ for eLearning provides novices and experts alike with the capabilities needed to create and deliver compelling, self-paced online courses; conduct highly interactive virtual classes; and efficiently manage training programs.

With Adobe Connect for eLearning, you can:

• Easily create high-impact online training

• Deliver engaging virtual classes and on-demand courses

• Manage participation, track progress, and assess course effectiveness

• Easily integrate Adobe Connect with third-party systems

Forrester Research notes that 45% of public employees in the United States will be at retirement age within the next five years. This impending retirement wave is creating a "knowledge void" in government that can be addressed through training, mentoring, and other methods. Forrester implores, "Now is the time to start."

Deliver rich, engaging, and effective online events

Adobe Connect for Webinars enables organizations to increase attendance, boost response rates, and generate more interest through rich and engaging, highly interactive online events.

With Adobe Connect for Webinars, you can:

• Promote easy webinar access and maximize attendance

• Capture audience attention and keep participants engaged

• Reach thousands with the Adobe Connect Webcast option

• Use event management services to help ensure success
