

Contour 3.5 Inch Bull Bar

Finish Textured Black
Mild Steel

Finish Black Power Coat
Mild Steel

Westin's Contour 3.5" Bull Bar hugs the curve of the vehicle's front-end profile with beastly style. The Contour 3.5" Bull Bar is 20% larger than a traditional Bull Bar. It features multi-faceted molded bushings that conceal body welds of the contoured center bar for a clean, finished, and bold look. The bushings are bolted on with visible fasteners, a look undoubtedly appealing to truck enthusiasts. 4 light mounting points on center bar allow the addition of up to 4 single post lights or a 30 inch LED Light Bar. LED Light Mount brackets are available separately. A License Plate Re-Locator is also available separately. The Contour 3.5" Bull Bar is available in textured black powder coat or semi-gloss black powder coat finish, both backed by a 3-year warranty. Also available in stainless steel backed by a lifetime warranty.
