

## **The Possibility Coaches Release A New Online Classroom For Success and Personal Development**

*Success is certain when you possess the mindset, tools and applications necessary to achieve the personal growth and business results you want for your life! Herein lies the basis for Synergetic Success.*

Doylestown, PA ([PRWEB](#)) October 18, 2011 -- "The future of small business owners, entrepreneurship, free trade and our global economy are dependent upon a 'new' definition of success. How we define success in the 21st century has to be entirely different from how it was defined in the 20th century," say The Possibility Coaches, Jon Satin and Chris Pattay.

Satin and Pattay cite the alarming increase of people in our modern, warp-speed paced, technoworld who feel lost, apathetic and floundering without a true sense of their life purpose as the main inspiration for the development of The Synergetic Success Online Program. "A majority of our population lives in a rut," says Satin. "However, it doesn't have to be that way. This is why our program is so beneficial. It can assist anyone to uncover their talents, be more productive, feel more confident and have a crystal-clear plan for success in life and business."

From this platform of re-defining success, The Possibility Coaches have taken their live Synergetic Success Class and turned it into an ongoing interactive, online global event.

"Creating real success in life and business is easier than you may think," says Pattay. "Success is certain when anyone possesses the necessary tools and applications to achieve it!" He then added, "Jon and I are so excited about being able to share this information with the online community. We know in our hearts that this is a program that has and continues to change people's lives."

According to Satin and Pattay, the intent of this program has always been to give the participant "a whole new perspective and outlook regarding one's personal, professional and business life. To be successful in the 21st century you must put service and co-operation with others first."

The results speak for themselves. Since developing and formulating this program in 2008, hundreds of people, from various educational, socioeconomic backgrounds, as young as 25 to as old as 75, have benefited from The Synergetic Success Class.

Testimonials from graduates of this program cite it as "an awesome experience," "a real opportunity to learn new tools and strategies to create significant changes in my life and business," to "it taught me how to release my fears and anxiety about the future and how to trust myself," and "a great framework for anyone who is looking for a way to live a more balanced, peaceful and successful life."

The Synergetic Success Online Program is formatted in such a way that anyone can participate at their own pace, wherever and whenever they want. It is delivered in six individual modules via email containing videos, guidebooks, information, tools and techniques that can assist anyone to speed up the process of creating genuine personal growth and success in life and business. Participants determine the area(s) in their life they want to concentrate on to create new levels of balance, achievement and success. These areas include Career, Finances, Relationships, Health and Spirituality. The package includes an exclusive online forum where

participants, past and current, come together to share personal experiences, assist each other and ask questions.

"This is not another one of those downloadable E-Books," says Satin. "Chris and I are available for anyone who would like to engage our guidance and expertise in the areas of personal development, relationships and business. As part of the program, we also host a monthly webinar available to all program participants."

Based on findings, it appears that for anyone who is looking to create real, lasting positive change in their personal and/or professional life, The Synergetic Success Online Program will exceed expectations.
