

Multidisciplinary program to treat TBI and Spinal Cord Injuries

The GAIN program is a multidisciplinary initiative to maximize the health, well-being, participation, & quality of life of all individuals and families living with spinal cord and brain injury. GAIN integrates nutrition, occupational therapy, acupuncture & oriental medicine. The program addresses physical, cognitive and psychosocial impairments.

The definition of GAIN is to get something desired, especially as a result of one's efforts. We are ready, are YOU?
