Shaded Line Photoworks provides Fusion Virtual Tours with the highest quality photography. All pictures are taken in HDR which allows all of the details to be seen, e.g. no white-out windows or dark interior corners. In addition to still photography, panoramic spins are taken in the same manor. Tours are posted to our website as well as linked to Realtor.com. A Single Property Website can also be built to attract more potential buyers. A sign rider can be placed on your sale sign and shows a QR code, as well as the web address of the tour. This allows those passing by to immediately view the tour and property info from a smartphone. In addition, further syndication is included with all tours, including:

- Trulia
- Zillow
- Oodle
- Vast
- OLX
- Trovit
- Homes.com
- Real Estate Digital
- Facebook
- Twitter
- Pintrest
- LinkedIn
- YouTube
- Craigslist

There are also add-ons available which include a floorplan, which can act as a map for the tour, allowing viewers to see the layout and where each picture or panorama was taken. Astro Zoom is an animation that starts in a full view of Google Earth and zooms into, and pans around the featured property. Lastly, A Twilight Shot adds a beautiful artistic picture of the property to the tour and can be printed as a gift to the buyer. Included with all tours are customizable flyers like this one.
